Congratulations are in order for John "DRI Killer" McLaughlan (No, he isn't having another baby) who signed a \$2.5M agreement with Acbal (Sun Moon Star). The agreement licenses DOS 5 per processor on a worldwide basis for 3 years (they will be replacing DRI DOS which they currently ship outside the US). In addition Acbal is signing up for Windows 3 on all 386/486 systems shipped in the US.

Good work, JDI
