

Bradsj wants Barry Simons at PC Mag on
the pre-beta list. Can you follow up
and get name/address/etc.

thanks,
David

which meetings are these?

one question that is coming up a lot now is the "chinese wall"
question.

my answer has been along the lines in your note -- ms apps is just
another isv; we work with lots of isv's; they are critical to our
success; ms apps writes for mac too; ms apps asks us for features,
just as other isv's do; the purpose of an os is to run apps; etc.

we should flesh this out into a more direct answer to the chinese
wall question.

we can't break 386max just to protect cp 850.
