

I thought that it would great to help ensure that win3. I shipped this year. I thought that in principle I would be able to start working at the beginning of July and do this in parallel with getting TIGER complete. I have TIGER almost running itself and can spare time to working other issues.

great.

I want to know how the got sent the task switch api. I have a hard time believing this, and a harder time accepting it. dri development is in the uk. after I learned that we sent dr the win vxd I went on a rampage and everyoee assured me dr was off of all our mailing lists. how could this happen?

|
| As I was telling you that Digital Research is on our list as a recipient
| of Task switching API but the surprising thing is that the address we
| have is in UK. I wonder if they have a branch in UK or there is some
| other company with the same name.

i read in infoworld today that he left claris. I could smell
that coming.

Date: Mon Jun 10 18:56:26 1991

which versions of msdos does tandy currently ship?

do they give customers a choice of 3.3 or 4.01? (my guess is no)

never mind, i see in your previous mail you said that they
did give users a choice.
