CONFIDENTIAL

This is how we respond to DR-DOS people.

nope. just reply privately to people that are encountering problems.

Thanks for checking

Andy

| Do you want me to go ahead and post this as a general message up on
| the forum?
| Thanks

| For beta testers that report problems w/ DR DOS and 3.1:

| DR-DOS is an untested and therefore unsupported operating
| system. MS-DOS (or OEM versions of it) is required for
| Windows. Using DR-DOS with Microsoft Windows is
| at the sole risk of the user. We don't support it.

| | Janine,
| | What should I tell these Dr. DOS people, if anything.
| | Thanks

| | Has anyone had any luck installing Win 3.1 under DR DOS 6.0? I get

as
| | far as disk # 2 then get dumped to dos with the message:
| | Standard Mode: Protected Mode tapping error.

| | There is 1 Reply.

| | I've got the same problem with DR DOS 5.0. Unfortunately, that's
all

| | the info I have...it still doesn't work. I reported the problem and

| | have been trying different things, although nothing has worked yet.

| | I'll let you know if I ever get it to work.
