neither paul nor mikemap have responded. *Privileged material redacted*
 steveb said put in a kinder gentler message.
 i have sent both paul and mike follow up mail and am still waiting to hear.

 Subject: terminal scrolling
 Date: Fri, 07 Feb 92 12:57:27 PST

for a few builds (incl 61d final beta), terminal allowed scrolling with pgup/pgdn without scrll lock on. now it doesn't. it's very annoying.

 Subject: .std font dialog
 Date: Fri, 07 Feb 92 13:52:11 PST

i heard that the font pack will have a new std font dialog. and that it will call things TypeFace rather than Font.
 if this is true, i think it's a bad idea.
 We shouldn't go around changing standard terminology in std dialogs. It will just confuse people. We picked a term that follows accepted usage. while "typeface" may be more proper to a typographer, "font"
