Actually, Bradsi asked me last week to put XSoft on the No Pre-Release List. Not sure why, but he did....

Dear Glenn:

Per our e-mail correspondence in late July and early August, I and my co-worker Robert Kincaid sent in our names and address to the Chicago beta program. We received the application diskettes, and returned them September 15.

We have not yet received the beta kits, and I am concerned that perhaps our applications were mishandled. Can you or someone else please follow up with the appropriate parties and let us know when we will be receiving our beta copies? We are looking forward to the opportunity to test Chicago.

The "company id number" given to me by the beta program is 129891. Robert Kincaid's is 129892.

Thanks for your help.

Fred
