Hi Julie,

I would like to update you on the progress regarding your outstanding issues. Information on the installation routines is currently not available. This information should be available within the next few weeks and will be made available to all ISV at the same time. This of course is scheduled to change.

The ENAPH.DLL has been released and is available at [www.microsoft.com](http://www.microsoft.com) in the Developers Only section. If you have trouble downloading this, please let me know.

Bill is currently working with Troy on the TCP/IP installation routines. I have forwarded this information to Bill and will check with him on his status.

If you have additional questions or concerns, please let me know. Thanks.

Michael
