

Should GO license sys sw to other HW vendors?

Key - soft concern is that any apps they write will run on all NB platforms

Next Steps

1) LF to spend more days @ GO to soak up GO tech
→ evaluate what it means to write app for GOOSE (in comparison other potential pen based environments)

2) → Obj-oriented Basic
→ attributed - file system
↳ obj-oriented fw
↳ persistent obj database
prot. mode Windows 3

C++
