Boy, I keep reading more and more in the press and I guess I keep seeing things that run counter to the facts as I remember them. This weeks made me laugh because the facts aren't just distorted, they are plain lies. Marc claims this week was that Netscape turned us down on flat-fee license arrangement. We know that the potential agreement ended on a very different note, this was way back in december.

We can both play this game. I don't know if it would hurt us, but damn I want to start attacking marc's credibility.
