2.2 Distribution of IE Code. During the Term, Microsoft hereby grants to CompuServe a royalty-free, non-exclusive, personal, non-transferable, non-assignable, limited worldwide right and license to reproduce, license, sublicense, display, perform or otherwise distribute, and have reproduced, licensed, sublicensed, displayed, performed or otherwise distributed, to and by third parties, object code versions of the IE Code, and any Changes to the IE Code created by CompuServe under this Agreement, solely as part of or for use with the CompuServe Products and Services.

2.3 Ownership, License Back.

It being understood that no changes made by CompuServe will be for Microsoft unless expressly agreed to by CompuServe.
- (b) **CompuServe's Ownership.** Subject to (i) Microsoft's ownership of the underlying Licensed Software and Changes thereto created by or for Microsoft, (ii) CompuServe's license grant to the underlying Licensed Software in Sections 2.1 and 2.2, and (iii) CompuServe's license back to Microsoft as set forth in Section 2.3(c), CompuServe shall own all right, title and interest, including all related intellectual property rights, in and to any Changes to the Licensed Software created by or for CompuServe ("CompuServe Changes").

3. CHANGES & REQUESTED CHANGES TO SOURCE

3.1 Intent: New Versions. It is both parties' intent that CompuServe's distributed version of the IE Code be fully compatible with the version of the IE Code distributed by Microsoft, while giving

CompuServe the ability to differentiate its version by adding value with respect to the CompuServe Products and Services. CompuServe and Microsoft wish to ensure that Microsoft's underlying code base in the IE Code remains functionally intact, subject to this Section 3, yet CompuServe is able to add value. Accordingly, unless otherwise agreed to by the parties, CompuServe will use all reasonable efforts to integrate new versions of the IE Code supplied by Microsoft no less than twice yearly during the Term.

3.2 Changes by CompuServe. For any Changes to the IE Code desired by CompuServe, CompuServe must comply with the following procedures:

- (a) *Allowed Changes.* CompuServe may make Changes in the IE Code: (i) consisting of additions or extensions to the IE Code; (ii) which constitute modifications, enhancements, or subtractions of code solely where such Changes are for the purpose of modifying any aspect of the IE Code to make the CompuServe version of the IE Code customized for the CompuServe Products and Services while still maintaining compatibility as intended by the parties under Section 3.1; (iii) which constitute modifications, enhancements or subtractions of code where such Changes are for the purpose of replacing, modifying or subtracting any or all components, extensions, APIs or wording with respect to the Microsoft Network or any other products or services, including but not limited to on-line services, that are not CompuServe Products and Services; or (iv) which constitute modifications, enhancements or subtractions of code where such Changes are for the purpose of ensuring backward compatibility with prior CompuServe Changes.
- (b) *Restrictions.* Except as expressly provided in this Section 3.2(a), CompuServe shall not make any Changes in the IE Code which would subtract or modify the IE Code base and/or unduly hinder or eliminate compatibility with the Microsoft-distributed version of the IE Code.
- (c) *Requested Changes.* Whether permitted to be made by CompuServe or not under this Section 3.2, CompuServe may submit, in writing or by e-mail, any reasonable Changes to Microsoft for implementation by Microsoft. Microsoft may decide to implement such Changes within a reasonable time period on behalf of CompuServe and Microsoft's other licensees. If Microsoft reasonably refuses to implement such requested Changes, CompuServe may only implement such Changes as otherwise permitted under this Section 3.2.
- (d) *Disposition of Changes.* Should CompuServe implement any CompuServe Changes under this Section 3.2, then CompuServe shall license such CompuServe Changes to Microsoft as set forth in Section 2.3(c); provided, however, that CompuServe shall not be required to provide to Microsoft such CompuServe Changes in any version of the IE Code for a period of ninety (90) days following CompuServe's first customer shipment of the CompuServe Changes in CompuServe's version of the IE Code, and Microsoft's license to such CompuServe Changes under Section 2.3(c) and this Section 3.2(d) shall not be effective until the expiration of such ninety (90) day period.

3.3 Changes by Microsoft:

- (a) Microsoft shall, as soon as reasonably known but at least on a quarterly or other periodic basis as mutually agreed to by the parties, share with CompuServe future plans for Internet Explorer. Microsoft shall, in cooperation with CompuServe, use reasonable efforts to ensure that future development of Internet Explorer is coordinated with CompuServe anticipated requirements.
- (b) Microsoft shall provide CompuServe, on an on-going basis during the development process, code drops of pre-release versions of the IE Code.

- 4.3 Consideration For Support Services. In consideration for the Support Services, CompuServe shall pay Microsoft an annual fee of Fifty Thousand Dollars (\$50,000). Such payment shall be made in advance of the year for which it is due. The initial payment shall be made within fifteen (15) days of the Effective Date and annually thereafter on each anniversary of the Effective Date during the Term. CompuServe may, within thirty (30) days of the yearly anniversary of the Effective Date, cancel the Support Services by notification to Microsoft.

7. NONEXCLUSIVE

Nothing in this Agreement will be construed as restricting Microsoft's ability to license, develop, sublicense, manufacture or distribute the Licensed Software, for itself or for any third party, nor as restricting CompuServe's ability to license, develop, sublicense, manufacture or distribute any software other than the Licensed Software for itself or any third party.

8. CONFIDENTIALITY

- 8.1 Each party shall protect the other's Confidential Information from unauthorized dissemination and use with the same degree of care that such party uses to protect its own like information. Neither party will use the other's Confidential Information for purposes other than those necessary to directly further the purposes of this Agreement. Each party will use its best efforts not to disclose to third parties the other's Confidential Information without the prior written consent of the other party. Except as expressly provided in this Agreement, no ownership or license rights is granted in any Confidential Information.
- 8.2 The parties' obligations of confidentiality under this Agreement shall not be construed to limit either party's right to independently develop or acquire products without use of the other party's

The term "residuals" means information in non-tangible form, which may be retained by persons who have had rightful and good faith access to the Confidential Information, including ideas, concepts, know-how or techniques contained therein. Neither party shall have any obligation to limit or restrict the assignment of such persons or to pay royalties for any work resulting from the use of residuals. 3. Localized Versions Supported.

Microsoft will provide all source and resource files necessary to build the following localized version of Internet Explorer 2.0: German, International English, French, Spanish, Italian, Swedish, Dutch, Brazilian, Norwegian, Danish, Finnish, and Japanese.

B. Anticipated Future Versions of Internet Explorer Code.

1. Internet Explorer 3.0

The Internet Explorer 3.0 product is optimized for value added services to be easily built on top of a set of Windows operating system internet services currently known under the code name "Sweeper." With the 3.0 release, Microsoft will provide to CompuServe Sweeper binaries that CompuServe may freely ship with CompuServe product. Microsoft will also supply source code to the IE components that sit on top of these system services and that provide the rich functionality that characterizes the 3.0 product such as frame support for navigation, favorites, history, the html display and rendering code, the code supporting VB scripting and OCKs, and other associated code that ensures broad compatibility with web standards and robust browser performance.

2. Localized Versions Supported.

(Design goal of 3.0 product is to eliminate the need for unique localized product via UNICODE casing)

II. Internet Explorer Tools.

Testing Tools:

CompuServe will receive a list of all testing tools used by Microsoft in developing any elements of the Internet Explorer. Testing tools include but are not limited to software and hardware components necessary to perform performance, user interface, compatibility, functional regression, component test, alpha and beta test. CompuServe will receive only those testing tools that are not readily available as commercial products. Delivery of each tool will consist of (i) all source and supporting files necessary to compile, link and build the tool; (ii) documentation necessary for installing and configuring the tool as available and on an "AS IS" basis; (iii) all relevant test suites (unit, subsystem and system level tests).

Specific deliverables unique to Microsoft's Internet Explorer test tools include:

1. Detailed reports from our RAID database providing a current list of known bugs and running list of fixed bugs since last release.
2. Internet Explorer browser test cases - a snapshot of the HTTP server that hosts our browser test cases.
3. International test tools and checklists that we use to verify dialogs, setup, build verification, and country setup sensitivities.

Development Tools

CompuServe will receive a list of all development tools used by Microsoft in developing any elements of the Internet Explorer. CompuServe will receive only those development tools that are not readily available as commercial products. (As we are running a special version of VC, we will provide a drop of our build environment). Delivery of each tool will consist of (i) all source and supporting files necessary to compile, link and build the tool; (ii) documentation necessary for installing, configuring and using the tool as

Internet Explorer Source License & Distribution Agreement
Draft: 12/06/95 4:39 PM

available and on an "AS IS" basis; and (iii) Functional and Design specifications for each tool as available and on an "AS IS" basis.

III. Delivery Schedule for Licensed Software Deliverables.

Internet Explorer 2.0 source and object code (English version): available upon signing
Internet Explorer 2.0 European localization files: available 2 weeks after signing
Internet Explorer 2.0 Japanese files: (currently in beta)

Estimated delivery of 3.0 alpha drop to CompuServe: 2 weeks after signing
Estimated delivery of 3.0 beta drop to CompuServe: 7/96
Estimated final delivery of version 3.0: 6/1/96
(Design goal of 3.0 product is to eliminate the need for unique localized product)

EXHIBIT C

BRANDING & ATTRIBUTION REQUIREMENTS

On all CompuServe and/or Spy branded product which includes Internet Explorer or CompuServe's version of the Internet Explorer, packaging, and promotional materials, CompuServe shall give appropriate attribution to Microsoft as the source of the IE Code, and in that connection shall also use the Microsoft Internet Explorer name and logo pursuant to Microsoft's standard trademark policies.
