

Q: where there is some feature that we might implement soon b/c would ~~be~~ make it incompatible w/ Dr DOS -

Windows/386 and Redirector both run - since they use some undocumented calls, DRE must have reverse engineered the MS code -

What things are missing from Dr. DOS around which MS can build a ~~good~~ useable feature -
?

Message

We ~~do not~~ test our products only on MS-DOS. ~~MS'~~ MS' product warranties not applicable to DR DOS.

Fan Lennon -

Aaron Reynolds ? - not involved in ongoing DOS development -
