

# DIGITAL RESEARCH SOFTWARE PERFORMANCE REPORT

P.O. BOX 579  
PACIFIC GROVE, CA 93950

Product Name and Version	DR DOS ER 3.31
Date	28 July 1988
User Name	Collin Brendemuehl
Company Name	Meridian Micro/Data System
Address	3900 NW 39th Expwy #102W Oklahoma City OK 73112
Phone	405-946-6690 Ext

Report Type	Rate Problem Impact
<input checked="" type="checkbox"/> Problem/Possible Error	<input type="checkbox"/> 3 Shuts Down System
<input type="checkbox"/> Suggested Enhancement	<input checked="" type="checkbox"/> 2 Impairs System Performance
<input type="checkbox"/> Document Suggestion	<input type="checkbox"/> 1 Causes Inconvenience
<input type="checkbox"/> Other	<input type="checkbox"/> 0 Needs Suggested Enhancement

Operating System Version and Serial Number (if different from Product Name shown above)		Product Serial Number 1146-0000-000023	Language
		Microcomputer Manufacturer Sperry IT	Software Supplier Name and Address
Hard Disk(s) Size _____ Capacity _____	Floppy Disk(s) Size _____ Capacity <u>1.2</u>	CPU Type (2-86, 8080, 8086, etc.) 286 8Mh 1 wait	Peripherals
Density: Single _____ Double _____		Memory Size _____	Memory Configuration _____

Problem Description: (Please describe the problem and how it can be reproduced, your diagnosis and your cure, if known. Be concise and attach a listing, if available.)

Running w/ Proteon Pronet 10 and Netware 2.1 SFT.  
IPXPRO.COM and NET3.COM attach properly to server but login drive F: is not available to user. Apparently MS DOS and DR DOS communicate with Netware differently. Under MS DOS default drive is F: because of 5 possible storage devices. DR DOS is apparently reporting a actual number of storage devices, dynamically based on

Not verified by DRI Monterey. (No Netware) See iugeste
