JOHN BROCKHEAD  
STEVE TUCKER

FROM: MIKE SKELTON

DATE: 3rd APRIL 1989

The following list represents the current Beta test sites that will be testing TIGER II over the coming months. The Beta site coordinator is named with each site, and this person is responsible for reporting the findings, comments and problems directly to the EDC via FAX forms. This information should be sent directly to John Constant or John Linney.

It is clear from this list, that especially in Europe we need to identify further Beta sites that can explicitly test WINDOWS/386 and CODEPAGE.

I would be very grateful if you could help to identify these sites so that we can ensure that TIGER II is released with the highest degree of testing possible in these areas, and therefore another good solid product.

Best regards

Mike

*Phil - any ideas?*

*Please FAX to Mike Skelton*

*Mike*

*- A few suggestions overlap, you will need to contact them yourself though.*
