Germany - Albin Durmaier - No report.

France - Lionel Eppelle - No report.

Taiwan - Henry Huang - No report.

UK - Jon Williams - Verbal report - Cashwise have reported a potential problem with Autoroute - awaiting further info.

Concern expressed over breadth of support for networking products.

USA - Sue Nageotte - See attached report.

As can be seen, the response from some of the Beta sites has been disappointing, (in some cases consistently so). It is worth considering that we are nearing the end of the current Beta cycle having gained no benefit at all from some of the sites.

I believe that we should investigate the causes of this and find ways of alleviating this problem for the future.

Regards.
