I believe Marc is still working on the distribution licenses - so there should be no problem working the new agreement in there.

Marc - can you give us status update?

**Subject:** Lotus and WMP

Lotus has been working with Windows Media Player for months now. They are one of the few people that actually using the WMP OCX with an application. This is not something we really support, but they needed it, and we were committed by CraigE when he was here.

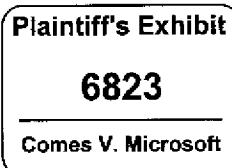

We have an agreement with them that allows them to ship... but since we have now redone the redist for WMP, I want to make sure they are still covered. I believe their agreement for WMP may be based on the IEAK agreement. Mark, can you comment on this?

It is important that we make sure that they are covered with the rights to ship this. They will be doing so in September for their beta with RTM est. in Nov.
