# RealNetworks STRATEGIC REVIEW

December 18<sup>th</sup>, 2000

RealNetworks Strategic Team

This presentation will be presented to Ben Waldman, Bill Veghte; Brad Chase; Craig Mundie; Jon DeVaan; Paul Gross; Ted Kummert; Will Poole; Yusuf Mehdi; Bruce Leak; Mich Mathews; Peter Ollodart; Brian Valentine; Charles Stevens; Chris Atkinson; David Cole; David Vaskevitch; Deborah Willingham; Eric Rudder; Jim Allchin; Mike Nash; Kent Scott; Orlando Ayala; Paul Flessner; Sanjay Parthasarathy; Carl Stork; Mich Mathews; David Martin (WINMKTG); Amar Nehru; Christopher Frank; Gail Dykstra; Alan Yates; Brad Goldberg; Michael Goulde; Sherri Bealkowski; Bill Landefeld; Bill Benack; Wendy Kahn; Rich Lappenbusch; Doug Miller; Overall Competitive Analysis Team; Rich Glew; Tim Rowe; Liz King; Mike Porter; Kerry McGowne

RichLap and DenWest will lead the presentation. KurtB, Dcaulton, DWorkman, Gschare, will also present segments.

"I think streaming media and digital delivery of media will be a standard part of everyone's life, just as cable TV and the VCR have become a standard part of the vast majority of Americans' lives over the past 15 years. In five years, if we're not quite at that level of ubiquity and pervasiveness, we'll be pretty darn close." - Rob glaser

Top Points made on this slide (Points form understanding-leading to conclusions later)

1. This slide is designed to bring you up to speed fast on what Real is and where they do business.
2. We are going to cover all this today so we won't drill into this slide.
- 3.
- 4.
- 5.

Why do I care about this slide BECAUSE We want everyone present to get a high level view before we start diving into to details.

Speaker Notes...

- Dominant in quantity of streaming web content (links visible to crawlers) is in Real format

## Why Does Microsoft Care About RealNetworks?

- ▶ **Real threatens Windows desktop relevance and usage**
  - ▶ *Microsoft may no longer be the driver for digital media excitement on PCs*
    - Digital media is the next big thing on business and consumer desktops, pushing os/pc upgrades and excitement
  - ▶ *Invading the user experience and moving users to their environment*
    - Real everywhere throughout the desktop, selling billboards
    - Once user is in Real, you don't need Windows for media
- ▶ **Real threatens Windows growth opportunities**
  - ▶ *Windows for consumer entertainment and devices threatened by embedded Linux with Real Platform + Partners*
  - ▶ *Unix shops deploying streaming don't need Windows 2000 Server*
- ▶ **Real threatens MSN in broadband and media**
  - ▶ *Real is already an extension of AOL*
    - Collectively control UI, content, platform, advertising and sponsorship
    - Extensively integrating communications products and services e.g. AIM optimizations, Net2Phone
  - ▶ *Battle shifting to consumer usage, not distribution*

Rich Lappenbusch

Dave Fester (script)

Top Points made on this slide (Points form understanding-leading to conclusions later)

1. Real threatens 2/3 MS core businesses today.
2. Real threatens our growth
- 3.
- 4.
- 5.

Why do I care about this slide BECAUSE we can lose control over our ability to

Speaker Notes...

e.g intercepting download experience

Disintermediates windows from the media experience with linux appliance.

Free OS matters in Consumer electronics device mfrs because of price point if it can do what they need in media infrastructure

Digital media is the next big thing on business and consumer desktops, pushing os/pc upgrades and excitement— if Real wins:

Why upgrade Windows?

Why Media .NET? Real has the media platform and services all in one

## Board

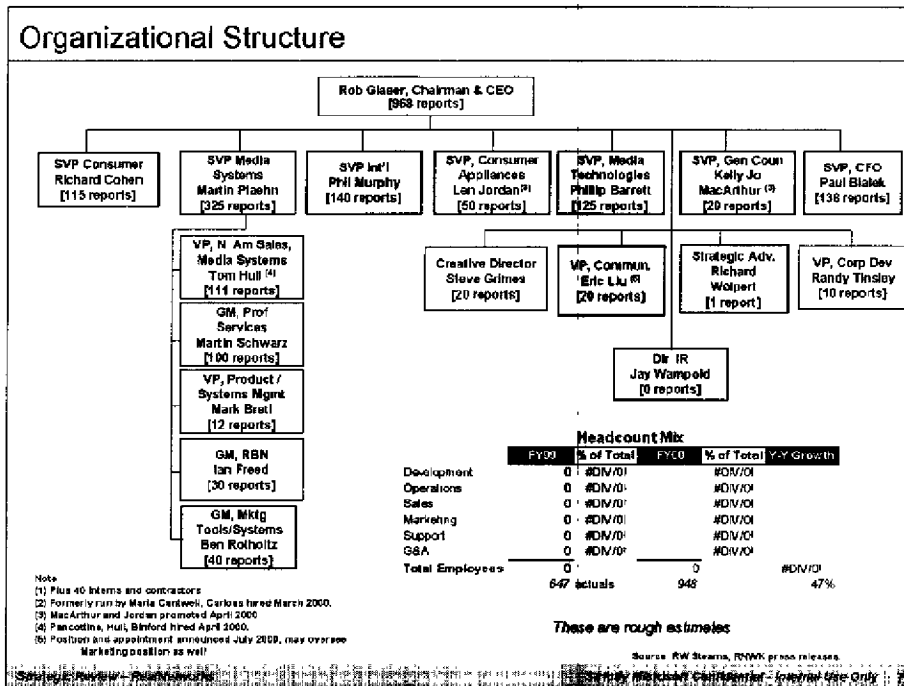

- Robert Glaser, Chairman/CEO**  
 \* Founded company in 1994  
 \* 10 years at Microsoft, most recently VP of multimedia and consumer systems  
 \* 1997-99
- Edward Bleier, Director**  
 \* Director since April 1999  
 \* Since 1996, President of Domestic Pay TV, Cable & Network Ventures for Warner Bros.  
 \* Chairman of the 57th Annual Conference of the National Association of Broadcasters for the leaders of the television, film and cable industries  
 \* Age 75
- Mitchell Kapur, Director**  
 \* Director since October 1999  
 \* Business school graduate, LP since January 1999  
 \* Degrees Lotus 1-2-3, founded Lotus Development Corp and served as CEO from 1982 to 1985  
 \* Age 47
- James Breyer, Director**  
 \* Director since October 1999  
 \* Managing Partner of West Ventures - since March 1995  
 \* President of Western Association of Venture Capitalists  
 \* Age 58
- Bruce Jacobsen, Director**  
 \* Director since August 1997  
 \* Business school graduate and CEO from February 1996 to November 1998  
 \* 8 years at Microsoft, including GM of Kids/Games business unit  
 \* Age 40

## KEY POINTS

- Financials: Strong historically**  
 \* High revenue and profitability growth  
 \* R&D not keeping pace  
 \* Inexpensive employee growth
- Board: Well respected and indicative of positioning**  
 \* Intimate knowledge of Microsoft products and practices via extensive work experience  
 \* Directors represent various fields related to the business: Venture Capital, Content programming and software development  
 \* Ties to Warner Bros. through Board's representative of growing closeness between AOL/TTW and WBTV
- Ownership: Highly concentrated**  
 \* 45% owned by insiders, all of whom personally by Rob Glaser  
 \* Glaser's stake is down from 65.4% as of December 31, 1998 via 80% from acquisitions and a secondary offering and from selling his shares  
 \* Maria Carbone exercised 181,200 options for \$11M to fund her successful venture company

Ownership	
① Insiders: Directors and Officers	② Outsiders: Institutions and Retail
③ Influencers: Analyst Coverage <ul style="list-style-type: none"> <li>&gt; Sell side analysts most directly influence new purchases by institutions and high net worth individuals</li> <li>&gt; Large numbers of new analysts with positive ratings could help to explain the rotation among the institutional base as prior holders take profits or get buyer's remorse</li> <li>&gt; Generally position Real as a core tech holding</li> </ul>	④ Key Points: <ul style="list-style-type: none"> <li>&gt; Insiders and original institutional investors are selling</li> <li>&gt; Retail investors have been scared off by dot carnage of market correction</li> <li>&gt; New institutions (and some old ones) filling the gap upon the recommendation of analysts</li> <li>&gt; Newest investors (institutions) probably more sensitive to swings in confidence among the analysts</li> <li>&gt; Further correction possible, but little risk of implosion (ala DSL stocks) given strength of fundamentals</li> </ul>

Why do I care about this slide BECAUSE

Speaker Notes...

**ROB GLASER**

Chairman & CEO, RealNetworks

Rob Glaser is founder and CEO of RealNetworks, Inc. (Nasdaq: RNWK), the recognized leader in media delivery on the Web. Since 1995, RealNetworks has pioneered streaming media delivery over the Internet through its standards-setting RealAudio, RealVideo, RealPlayer and RealSystem products. In 1999, he established RealNetworks' leadership in the digital distribution of music with the launch of RealJukebox and RealSystem MP. Mr. Glaser has a B.A. and an M.A. in Economics and a B.S. in Computer Science from Yale University. At Yale, he served as editorial-page editor of the Yale Daily News. Mr. Glaser serves on several non-profit boards and committees, including his appointment by President Clinton to the Advisory Committee on Public Interest Obligations of Digital Television Broadcasters. Prior to founding RealNetworks, Mr. Glaser worked for Microsoft from 1983 to 1993. He managed Microsoft Word, then moved to the company's networking group, before becoming Vice President of Multimedia and Consumer Systems. Mr. Glaser has long

Continued from previous slide .

been intrigued with the nexus of media, computing, and communication. As television and radio transition from a broadcast to an online medium, he envisions turning the Internet into the next mass medium.

**THOMAS F. FRANK**

Chief Operating Officer

Mr. Frank joined RealNetworks in January 1999. From 1995 to 1998 he was the Sr. Vice President of Dick Clark Productions responsible for television program development and production. Prior to that, Mr. Frank was Vice President of Television Programming for The Leo Burnett Company responsible for client sponsored programming from 1992 to 1995. Mr. Frank also served as the Vice President of Development for Carolco Television from 1989 to 1991. He began his career in the general advertising division of the Procter & Gamble Company in 1985. Mr. Frank holds a BA in English Literature from the University of Cincinnati.

**PHILLIP BARRETT**

Senior Vice President, Media Technologies

Mr. Barrett joined RealNetworks in November 1994 as Vice President of Software Development. From March 1986 to October 1994, Mr. Barrett was a Development Group Manager at Microsoft, where he led development efforts for Windows 386, Windows 3.0 and Windows 3.1. Mr. Barrett holds an A.B. in Mathematics from Rutgers University and an M.S. in Computer Sciences from the University of Wisconsin, Madison.

**PAUL BIALEK**

Chief Financial Officer and Senior Vice President, Finance and Operations

Mr. Bialek joined RealNetworks in June of 1998 and is responsible for finance, facilities, MIS, customer service and technical support. Prior to joining RN, Mr. Bialek was CFO and Vice President of Finance and Operations with Metapath Software Corporation. From 1993 to 1997, he was CFO and Vice President of Finance and Administration for Edmark Corporation. Mr. Bialek started his career at KPMG Peat Marwick, where he was employed in a variety of positions for 11 years. Mr. Bialek has a degree in business administration from Seattle University and is a Certified Public Accountant.

**RICHARD COHEN**

Senior Vice President, Media Services

Cohen joined the company in October of 2000 and is responsible for overseeing media delivery service initiatives for RealNetworks, including the Real Broadcast Network (RBN). Prior to joining RN, Mr. Cohen spent more than six years at Metro-Goldwyn-Mayer, where he served as President of Home Entertainment and Consumer Products, with responsibility for the worldwide manufacture, marketing, sale and distribution of the company's film, television and interactive products for video and DVD markets. Cohen also oversaw the product licensing and merchandising of MGM properties, and most recently headed all of the studio's new media initiatives. Prior to his work at MGM, Cohen spent six years with the Walt Disney Company managing their home video division and overseeing the videocassette and laser disc release of all Disney, Touchstone, and Hollywood Pictures films worldwide. Cohen earned his MBA from University of California, Los Angeles, and his B.A. in English and Linguistics at Amherst College.

**LEN JORDAN**

Senior Vice President, Consumer Appliances

Mr. Jordan has served as Senior Vice President of RealNetworks since January 1997, and, as of April 2000, is the Senior Vice President of the Consumer Appliances group. From November 1993 to November 1996, Mr. Jordan was employed in a number of capacities at Creative Multimedia, Inc., a developer and publisher of CD-ROM/Internet products, most recently serving as President. From September 1989 to November 1993, Mr. Jordan was employed at Central Point Software, Inc., a utility software publisher. Mr. Jordan graduated magna cum laude from the Eccles School of Business at the University of Utah with B.S. degrees in Finance and Economics.

**KELLY JO MACARTHUR**

Senior Vice President, General Counsel, and Corporate Secretary

Ms. MacArthur joined RealNetworks in October 1996. She was previously Director of Legal and Business Affairs for Compton's NewMedia, Inc., a Tribune company, which was acquired by The Learning Company in 1996. Prior to that she was with the law firm of Sidley & Austin in Chicago. MacArthur has a B.A. summa cum laude from the University of Illinois at Champaign-Urbana and a J.D. from Harvard Law School.

**PHIL MURPHY**

Senior Vice President, International

Continued from previous slide..

As senior vice president, international, Mr. Murphy oversees all of RealNetworks' business outside of North America. With more than 22 years' international experience in the music industry, most recently as senior vice president, European region, for Sony Music Entertainment Group, he brings an extensive record of implementing new strategies for digital music and e-commerce. He also served as chairman of Sony Music Europe's new technology strategy board and was responsible for corporate strategy distribution and IT across Europe. Prior to his tenure at Sony, Phil spent 18 years at Warner Music International in a variety of senior positions, including vice president of Warner Music Asia Pacific. He holds a B.A. with honors in Economics from Cambridge University.

MARTIN PLAETH

Senior Vice President, Media Systems

Mr. Plaehn joined RealNetworks in September 1999. From April 1996 to August 1999, Mr. Plaehn served as President of Viewpoint Digital and its Chairman and CEO until its acquisition by Computer Associates in October 1998. Prior to Viewpoint, Mr. Plaehn led product development for Alias|Wavefront, a Silicon Graphics Company. Mr. Plaehn joined Wavefront in 1990 and served as Executive Vice President of Business and Product Development and was a member of its Board of Directors. Mr. Plaehn started his career as software developer at General Atomic Company in 1978, ISSCO Graphics in 1980, and Template Graphics Software from 1982 to 1990. Mr. Plaehn has a B.A. degree from the University of California San Diego (1978) and is a graduate of UCSD's Executive Program for Scientists and Engineers (1985).

BRIAN AIKEN

Vice President, Europe

Mr. Aiken joined RealNetworks in June of 1998. Immediately prior to this he had held a similar position with Intuit, Inc. Previously Mr. Aiken has held general management positions in Europe for Continuus Software, Inc. and Sun Microsystems, Inc. Mr. Aiken attended Trinity College, University of Oxford, where he took a B.A. degree with First Class Honours.

ALEX ALBEN

Vice President, Government Affairs

Mr. Alben represents the company on Internet policy issues and works within industry-wide efforts to develop and implement global standards, such as the Secure Digital Music Initiative. He has also served within RealNetworks as VP Music Group and VP Media Publishing for entertainment products. Prior to joining RealNetworks, Mr. Alben worked for Starwave Corporation from 1993-96, where, as V.P., Business Affairs, he helped launch many of Starwave's sports and entertainment sites. Previously, Mr. Alben was Associate General Counsel of Warner Bros. and Director of Business Affairs at Orion Pictures. He is a graduate of Stanford University and Stanford Law School.

MARK A. BRETL

Vice President, Media Systems Division

Mr. Bretl joined RealNetworks in March of 1998. From June of 1994 to March of 1998, Mr. Bretl was employed as Chief Operating Officer at Vivo Software, Inc., a developer of software based video conferencing systems and streaming media. From October 1983 to October 1991, Mr. Bretl was employed at Tecmar, Inc., a developer and manufacturer of PC and Macintosh computer peripherals, where he held a variety of positions, most recently as President & COO. Mr. Bretl graduated Magna Cum Laude from the University of Wisconsin, Platteville with a B.S. in Physics and Computer Science.

MARK HALL

Vice President, Media Publishing and Programming

Mr. Hall joined RealNetworks in October 1997, and oversees RealNetworks media publishing and programming efforts, which include the RealGuide, Channels, Stations, and GetMusic on the RealJukebox. From 1995 to 1997, Mr. Hall was an Executive Producer at Corbis, where he produced several award-winning CD-ROM titles and web sites. Mr. Hall began his career in interactive media in 1993 at Microsoft, working as a producer and editor on several of its first CD-ROM initiatives. Mr. Hall is a graduate of Carleton College and the University of Virginia School of Law.

TOM HULL

Vice President, North American Sales, Media Systems

Mr. Hull joins RealNetworks from Sequent Computer Systems where he was Director of Sales Operations, Americas. Hull started his career in the high-tech industry in 1979 at IBM, where he held various positions in sales, marketing and management. He honed his skills in roles of increasing responsibility at Amdahl and Sequent Computer Systems, where he focused on the telecommunications and aerospace industries. Hull was also a member of the 1980 U.S. Olympic Rowing Team and remains active in the sport. Hull holds a BA in Government from Dartmouth College.

JAMES HIGA

Vice President, Asia/ROW

Continued from previous slide .

Mr. Higa came to RealNetworks in September 1996. From January 1989 to August 1996, Mr. Higa was the Director for Asia/Pacific for NeXT Software, Inc. From 1986 to 1989, Mr. Higa served as Director of Product Marketing at Apple Japan, Inc. Mr. Higa holds a B.A. in Political Science from Stanford University.

**BORIS JERKUNICA**

Vice President

Mr. Jerkunica joined RealNetworks in January 2000, when the Company acquired Netzip, Inc., a leading developer and provider of Internet download management and utility software that Jerkunica co-founded, in 1992. As CEO at Netzip, Jerkunica was responsible for managing the day-to-day operations, strategic planning, financial matters and recruiting of sales and development staff. From 1987 to 1992, Jerkunica had been a software engineer at IBM, where he helped develop two major projects, including a computerized patient records hardware and software solution that allowed nurses to view a patient's medical information on a hand-held device at the patient's bedside. Jerkunica is a 1987 graduate of Emory University and holds bachelors and masters degrees in math and computer science.

**ERIC LIU**

Vice President, Corporate Communications

Mr. Liu joined RealNetworks in July 2000. Previously, he was Deputy Domestic Policy Advisor at the White House, shaping policy and providing political counsel for President Clinton on a range of issues. He also served during the first Clinton term as a foreign policy speechwriter for the President. In addition, Liu is a nationally recognized author and speaker. He has published acclaimed books on generational culture and racial identity, and has been an on-air commentator and online columnist for MSNBC, as well as a contributor to Slate magazine. He holds a B.A. in History summa cum laude from Yale College and a J.D. cum laude from Harvard Law School.

**SHELLEY MORRISON**

Vice President, Media and Distribution Sales

As Vice President of Media and Distribution Sales, Shelley is responsible for all advertising and marketing programs for RealNetworks' clients, as well as for the creation of traffic and e-commerce opportunities for all RealPartners. Ms. Morrison is one of the original pioneers in the development of interactive advertising and promotion. Prior to coming to RealNetworks, Shelley was the Vice President of Advertising for Starwave's Buena Vista Internet Group (formerly ESPN/ABCNews Internet Ventures), having joined them right after the launch of ESPN.com in 1995. In this capacity, she managed a sales team, and oversaw Starwave's Ad Operations, Client Services and Creative Departments. Ms. Morrison was formerly the Director of Marketing for the Seattle Supersonics in the NBA. She started her career in broadcasting, working for NBC and ABC in New York, London, and Africa.

**DAVE RICHARDS**

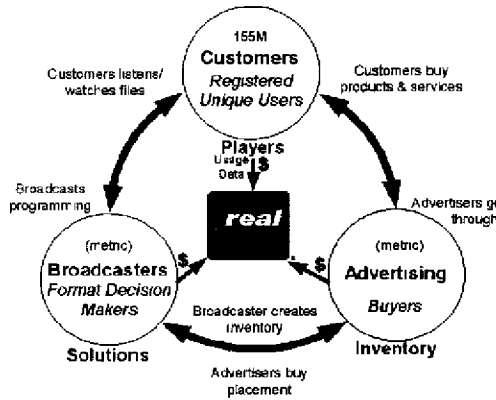

Vice President, Consumer Products

Mr. Richards oversees RealNetworks consumer products including RealPlayer and RealJukebox product lines. RealPlayer, the most popular Internet streaming media player, provides the best quality Internet audio/video consumer experience with support for the award-winning RealAudio & RealVideo as well as MP3. RealJukebox, the first complete digital music system, has quickly become the de facto standard for digital music since it was launched in Q2-99. Prior to RealNetworks, Mr. Richards held various senior management positions at Sybase & Symantec.

## Real's Story

### ① Real's Virtuous Cycle

Based on traditional broadcast media business model proven over decades

### ② Taxing the Cycle

- 1) Real gives server, hosting and sometimes even cash to top ICPs to adopt format and to promote player,
- 2) Users coming to download "free" player have to navigate up-sells to for fee player. Once installed, player takes over and prompts for more downloads, each with up-sells,
- 3) Real sells smaller ICPs solutions including servers, consulting, hosting, and promotion in guide.
- 4) More content, drives more downloads
- 5) Real sells ads based on traffic and takes 70% of ad revenue from radio station and other content it hosts;
- 6) Real sells users content subscriptions,
- 7) Cycle repeats with higher Real tax

"Here is where Glaser's "virtuous cycle" comes into play. The more people who have a RealPlayer on their desktop, the more content providers will opt to use Real's streaming-media technology. And ... the more likely people are to download a RealPlayer. "Content is the driving force"  
-FORTUNE

Rich Lappenbusch:

Bill Spencer (script)

Top Points made on this slide (Points form understanding-leading to conclusions later)

1. Real extracts revenue from every link in the value chain.
2. The cycle builds a network effect and builds on its own success, increasing revenue.
3. In general, Real tries to charge as much as it can, but for top ICPs (e.g. Disney, Universal, CNN, etc..) Real will give away software, encoding, hosting, promotion in the player and even pay for content to be offered in its format in order to drive player downloads. Real pays for exclusivity of content in its format knowing well MS cannot readily respond.
4. Users clicking on the link "Free Real Player" have to carefully navigate through Real's download page promoting the "for fee" player to find the free version
5. Once installed, the player takes over media types and the desktop and does not easily loosen its grip unless the user uninstalls it. The player is a Trojan horse additional Real software - Real Jukebox, Real Download, etc.. Each coming with an up-sell.
6. Real then pitches second tier ICPs that it has a huge installed base and is more committed to digital media than MS - "We live or die by your success." Real will cut price or sell something else in order to win format adoption. Real targets Windows Media accounts with better deals. For example, Launch.com initially got its software for free, after Launch's number of concurrent streams exploded, Real tried to charge it \$3M for its software. Launch resisted so Real compromised and sold it placement on Real Guide for something under \$1M. At this point, Real could inflict a lot of damage to Launch's business if it charges Launch standard prices.

Continued from previous slide...

7. When a user plays streams on these ICPs web sites, the player comes up with strong Real branding, a channel bar which lists other sites the user could click off to, e-commerce links (e.g. Amazon), and content (Take5). So Real monetizes playback experience even though in most cases the ICP pays for the stream and the server software. So Real competes with its partners for branding, promotion of content and e-commerce links, and now that Real is producing its own content with Take5 and content subscriptions.

8. Real charges hosting partners for software while requiring the ISP to charge no more for hosting and streaming in the Real format than in competing formats. And Real competes with these ISPs by offering ICPs RBN hosting solutions.

9. As Real installed base grows, it charges ICPs, advertisers, users, and ISPs more for software, promotion, hosting, and consulting.

Why do I care about this slide BECAUSE it summarizes Real's business model.

Speaker Notes...

**Who is a Broadcaster?**

- Music, Media & Entertainment Professionals
- Content Creators
- Consulting Professionals
- Internet Management, including CEO's & Executive Staff
- IS Management, including CIO's & CTO's
- MIS & Technical Staff
- Webmasters
- Software & Applications
- Marketing Management Professionals
- Networking Communications Professionals
- MIS & System Engineers

**The are in the following Industries:**

- Advertising & Design
- Music Production and Distribution
- Film & Video
- Fortune 1000 & Nasdaq 100
- Infrastructure
- Retail & Commerce
- Educational Organizations and Professionals
- Government Officials
- ISVs, IHVs, VARs, ISPs & OEMs

## Financial Overview

	LTM		Year Ended	Change
	September 30,	December 31,

<b>TOTAL REVENUE</b>	<b>\$41,326</b>	<b>\$50,411</b>	<b>\$60,039</b>	<b>\$67,124</b>	<b>\$219,410</b>

### ④ Key Points:

- > Revenues currently dependent upon domestic consumer licensing and server sales
- > Areas of focus for growth are advertising and services (segments); enterprise and network service providers (customers) and international (geography)
- > Licensing model does not appear to scale well (nonlinear relationship with the growth of customer segment)
- > Advertising revenue is tenuous given market downturn for technology
- > ICP growth is slowing, but remains critical to the story

## Key points

- Server licenses dominate revenue
- Fastest growing revenue segments are infrastructure and media services
- Real Guide available in 8 languages
- Major growth in Japan and Latam
- Significant investment in Europe
  - 25 news heads this year
- Japan is an exception to otherwise opportunistic (inconsistent) strategies
  - Strong tiered model
  - Aggressive solutions bundling w/SUN
  - OEM bundling agreements

Kurt Buecheler (to chop and move core to backup)

Speaker Notes...

Move stuff up to snapshot. .

## Stock Performance

① Inherently volatile: 4 drops >50% since IPO (11/97 to 12/00)

② Current correction maps to the market (last 1 yr compared to Yahoo, eBay, Infospace)

③ Many employees under water, but recruiting is still strong (story resonates to the outside)

④ Despite stock collapse, strong analyst support

> As of 12/13, trading down 76% down YTD, but 23 of 27 analysts rate Real a buy or strong buy

> More analysts initiate positive coverage (6 new analysts since August, 5 buy or strong buy, all positive), a sign of strength or great marketing to Wall St.

> Analysts point to strong fundamentals (large usage numbers, content availability, profitability) as reasons to support the stock

Analyst	Firm	Initiated Coverage	Rating
Garrett Bekker	Josephthal & Co	August-00	Buy
David Kestenbaum	ING Earnings	September-00	Buy
Phil Leigh	Raymond James	September-00	Strong Buy
John Graves	SG Cowen	September-00	Strong Buy
John Corcoran	CIBC World Markets	November-00	Buy
Myes Davis	Morgan Stanley	November-00	Outperform

## Market Conditions

①

### Real Maintains Format Share Dominance Among ICPs Based on Accepted, but Questionable, Methodology

- Most common measure of format adoption is crawling sites for instances of files
  - Includes old content that is no longer viewed
  - Can't penetrate protected sites, javascript, etc
  - 86% of all streaming web files based on crawls is in Real format, compared to 10% WM<sup>1</sup>
- Other measurements show a much tighter race
  - Platform use by top 100 ICPs: 77% Real, 59% WM
  - Nielsen reports 29% of home users viewed Real content, compared to 14% viewing WM in Nov<sup>2</sup>
  - Many ICPs report WM "stream share" at 50% or better
- Working with MediaMatrix/Nielsen on better metrics

②

### Real is Strong in DotComs, weak in LORGs

- DotComs -- 10,000 dotcoms in US, 20% stream (>25 files on site) but 16% went under this year<sup>3</sup>
  - 7 of 10 DotComs use Real as primary platform<sup>4</sup>
- LORGs -- Adoption of streaming among LORGs grew significantly from 10/99 to 9/00 -- now 20%
  - Real losing share rapidly in this segment, down 2 points since April while MS is up 22 points.<sup>8</sup>

Source: <sup>1</sup> NetCrafter, <sup>2</sup> Nielsen Netratings, <sup>3</sup> The Standard, <sup>4</sup> MS Vertical Content Research, <sup>5</sup> NetCrafter Velocity Study, <sup>6</sup> Information Week, <sup>7</sup> MS LORG DM Tracker

Gary Schare

Gary Schare (script)

Key points:

- Real has dominant share of Internet content, but the accepted methodology is questionable
- Much tighter race based on other measurements, such as platform adoption (number of ICPs using either format, or both) where Real leads 77% to 59%, and usage where Real's lead is only 30% to 13%
- Real usage among companies strong among all dot coms (7 in 10 vs WM at 3 in 10) but weak in LORGs (4 in 10, vs WM at 7 in 10)

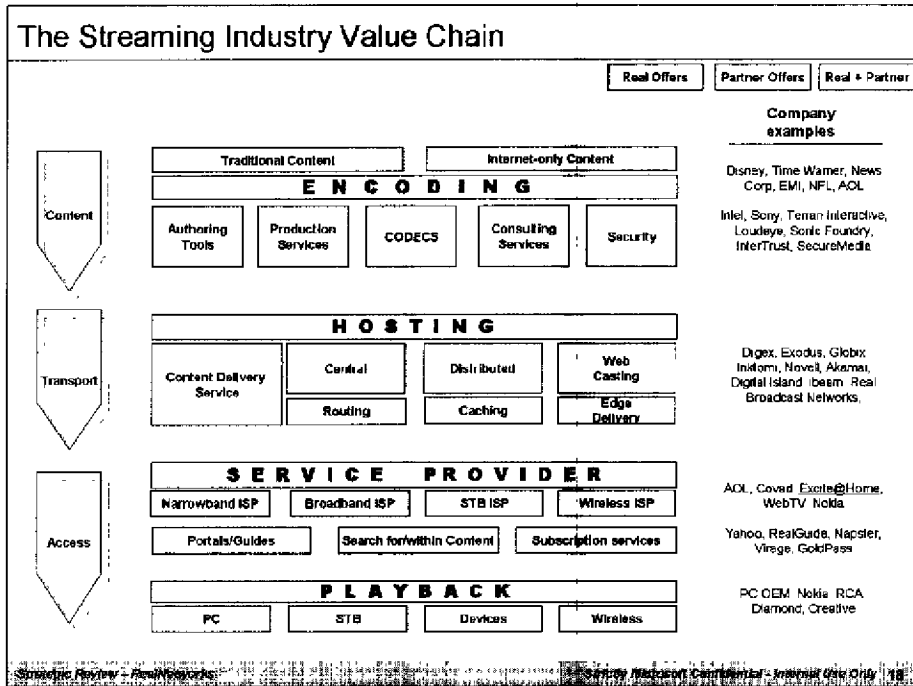

Backup notes

- Real aggressively pursuing share of adult content -- \$1.4B Internet industry -- with 60,000 adult sites and 21M visitors per month<sup>4</sup>
- Real increasing share of new streaming content on top adult sites, majority are proprietary/java, almost no WM<sup>5</sup>

To review, we have tried two different approaches to validating the Netcraft data:

• In April 00, we conducted a phone survey with 140 webmasters to obtain self-reported data on the number and format of streaming files on top sites. As expected, webmasters reported a much larger absolute number of files than the automated trawl found. We also found some shift in reported share of total streaming files for these sites -- 71% Real and 15% WM in the survey data, compared to 85% Real and 9% WM in the automated trawl. The Netcraft results for tier 1 sites tended to be more accurate than some of the tier 2 sites, but overall, we were seeing a very large advantage in format share for Real.

• In Oct 00, we shifted the way we look at Netcraft data from overall format share to a site by site "winning/fighting/losing" analysis of the top 100 MM domains. We examined the results of Netcraft's automated trawl to identify specific sites where we felt their data were questionable. We conducted a manual trawl of 50 of these "problem sites", and used this data to supplement/correct sites like CNN where we knew the automated trawl results were low. But in general, while the manual approach helped us improve the file count for some sites, it didn't significantly change our percentages.

- 1.
- 2.
- 3.
- 4.
- 5.

Why do I care about this slide BECAUSE

Speaker Notes...

Key points here must be:

Describe the slide ..all the pieces. Content, transport, access...

**They are filling all the niches...**it's like they had this slide and looked for and filled the holes

**Partnering is key to this picture...**everything not blue is coming from someone else

**Right now, everything relies on the Sony/Intel partnerships...**but they're working to make that less important.

## Demonstrations

**① Consumer Experience**

- Sony OEM OOBE
- Consumer Download Install
  - RealPlayer 8, RealJukebox 2, RealDownload
- Real Stealing users from the Mars & Windows UI

**② Subscription Services**

- Delivering NET style services today
- Free Services - Take5, Real.com, Quicksilver, News Alerts
- Fee Service (\$9.95/mo) - Premium content, Software updates, AddOns, Games, PG-13+ content

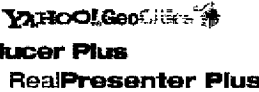

**③ Content & Rights Management**

- BlueMatter & Universal Music
- "Premium Digital Music Format"
- Tech, Content partnership w/ Universal, Magex
- RealJukebox/Magex technology req'd
- E-tail Partners - RollingStone.com, Launch.com, Lycos, Excite@Home

**④ Enabling content creation**

- A Window-less World
- RealProducer on Mac
- Server bundled on Linux, HP/UX, AIX
- Clients bundled BeOS, Linux
- Remote Admin via HTML+Java
- Platform supported: Windows, Mac, Linux, IBM AIX, Glib, SGI IRIX, Solaris, FreeBSD

**⑤ Windowsless Media World**

- Complete streaming solution with Real everywhere, windows nowhere

David Caulton

Top Points made on this slide (Points form understanding-leading to conclusions later)

1. Real screws with our products, turning internet and windows tasks into advertising vehicles.
2. Real makes Windows an unneeded option
3. Real is pursuing .net and using windows to make it happen
4. Real enables consumer and business content creation
5. Real gets onto desktops via online services, OEMs, and for the sake of content.

Why do I care about this slide BECAUSE you need to understand how the Real user experience works.

**1. Consumer Broadband Experience - AOL Plus (SeanAlex)**

This demonstration will show how aggressive RealNetworks is in taking over the client experience- from spamming the desktop to re-taking Windows file formats, to turning simple activities such as downloading *any* file from your browser and advertising opportunity. The general consumer experience will be shown with Mars in the background, AOL Plus as the provider- we're just 1 of 24M AOL subscribers who will get this player over next few months. We will wrap by showing that through distribution, technology, and content partnerships with AOL Plus and Yahoo, Real is delivering compelling consumer services that compete with MSN, Windows/IE, and Messenger.

Continued from previous slide...

•**OEM OOBE Scenario**

- Spamming the OS: Grabbing the desktop, MIME types, browser
- RealPlayer Format support- list of all formats supported, format autograb

•**Standard Consumer Install Scenario (builds on above)**

- RealJukebox - Taking over Windows file types
- RealDownload- Simple Windows Tasks become AdWare
- Performance- taking up to 32MB of active Windows memory- all the time

•**AOL Plus and Real: Impeding the Mars & Windows value proposition**

- Quickly show Mars experience w/ Windows Media
- Compare to AOL Plus - Doesn't conform to UI guidelines
- Content in Real format pops up RealPlayer. Eye candy, ads distract from value of Mars UI.
- Net2Phone via RealPlayer end runs MSN Messenger/Mars
- Other plays- RealProducer ---> Yahoo competing with MovieMaker (MSN not playing) (Dcaution)

**2. Subscription Services - Competing with .NET (SeanAlex)**

This demonstration will clearly show how Real is working to deliver .NET level services both free and for-fee in areas that compete with DMD as well as Windows . They have quickly adopted a subscription upgrade model, moving from \$19.99 per client to \$119.00/year per client and are delivering compelling content that extends beyond the G-rated material available on other sites. They're edgy and understand the NetGen community- between PG-13+ A/V content, a play to publish 3D games, distributing violent Quake-like first-person shooters, to a merging of the media player and gaming genres, Real is interested in being a fully rounded Digital Entertainment Publisher that competes with MSN, MSN Music, Microsoft Games, WindowsMedia.com, and more.

- Delivering on .NET w/ entertainment, automatic music delivery

•**Free Services**

- Take 5 Content Service - playing content & being spammed
- Push Music Download Service - partnered with MP3.com to automatically deliver
- News Alert Popups

•**Fee Service- Real GoldPass**

- Content play, Gaming Play, consumer entertainment play
- \$149 of Top 1% of market paying player market
- Areas where they're kicking our ass with NetGen'ers via content partners
  - Content - Show compelling content, PG-13, this isn't Disney, sex sells
  - Add Ons - Visualizations, Plug-Ins
  - Gaming - Not just a DMD threat- Real is a game publisher, leveraging gaming in player/jukebox as well as standalone.
- Glaser plans to move into music subscriptions ala Napster (quote)

**3. Content/DRM Play: BlueNote LiquidAudio - partnering with Universal on content/content delivery (Dworkman)**

The objective here is to show that Real's viral circle extends well into the area of content creation and distribution, investing in and exploring many different business models and partners to see what sticks. Prime examples to be demonstrated are Real's BlueNote partnership with Magex and Universal Music, and LiquidAudio as two completely different systems from a technological perspective to business models. Both leverage RealPlayer as the core component.

- connected, etc. do this from the mac using Java

Continued from previous slide...

- Real is owning value chain, business partners as well as platform provider to content providers such as Universal
- Rich format support inside RealPlayer
- Demonstrate user experience
- BlueNote Demonstration**
  - Purchasing content, using your Magex digital wallet
- LiquidAudio Demonstration**
  - Rich consumer experience, using AAC as well as our format, RJB plays both

#### **4. Content Creation - a Windowless environment (Dcaulton)**

This will be perhaps the most powerful of the demos- showing definitively that the entire viral chain can exist without Microsoft. Companies can partner with Real in a Windowless environment, essentially short-circuiting our value chain. We will note that bundling of their technologies is taking place on multiple levels from encoders and servers on Linux, HP/UX and other platforms, to the player in Linux and BeOS. Creation and Distribution of multiple formats of content can be done and playback supports a wide swath including fringe players such as Be. In essence, Real is interested in partnering (often exclusively) with every platform provider except for Microsoft.

- Show boxes: Linux server, Mac encoder, mac, beos Linux players
- Start encoding from the mac, note no admin needed to get a live event going
- Access really kicking on-demand content from the server box (need to show SMIL integration)
- Access a QuickTime video off of the server box
- Demo remote admining the server box to find out how many people are

## Products

	Product	Killer Features	OS	Price	Value to RN	Threat
Client	RealPlayer RealJukebox RealDownload	Must use to access 86% of content on the web	Mac windows, Solaris, Linux (player)	\$29 + \$29	Revenue Client Reach	<ul style="list-style-type: none"> <li>Key asset to nonwindows media world</li> <li>Enabler of nonwindows client devices</li> </ul>
	RealServer	<ul style="list-style-type: none"> <li>Use to access 155 million users</li> <li>Run on any OS you want</li> </ul>	Mac, Windows, Solaris, HP-UX, AIX, Linux, IRIX etc	400 stream = \$17,500	Revenue	<ul style="list-style-type: none"> <li>key enabler of low windows servers</li> <li>Key to RN business model today</li> </ul>
Content production	Server Extensions	Advertising, Authentication, splitting, cache	All server OS	e.g. 400 stream, auth = \$15k	Revenue	
	Real Producer	<ul style="list-style-type: none"> <li>Superior Video Quality</li> <li>Great End-to-end tools</li> </ul>	Mac, Windows, Linux	\$480 (Pro)	Format Dominance Keeps Real cool	<ul style="list-style-type: none"> <li>Create the media for everything above</li> </ul>
	Real Presenter	<ul style="list-style-type: none"> <li>Easy to convert PowerPoint into video and audio presentations</li> <li>Cool SMIL content</li> </ul>	Windows	\$57		<ul style="list-style-type: none"> <li>Better Media-enabled presentations than PowerPoint</li> <li>RN owns the Premier SMIL Editing solution</li> </ul>
	Real Slideshow	<ul style="list-style-type: none"> <li>The top SMIL author</li> <li>Adds interactivity to media</li> </ul>	Windows	\$57		

- Real owns most key components w/ partners, offer unmatched end-to-end experience
- Everything is sold on "first time's free" basis. Then Server products are extremely expensive
- All products are "good enough" - e.g., server scalability isn't stellar, but handles their 2000 stream SKU
- Pushing alternative platforms (Linux) very hard
- Nonwindows OS's solve a lot of problems for them.**

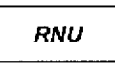

- Audience Reach and content dominance are why customers pay these prices

# Server Pricing

- Low "teaser" price point
- but many deals are much more contorted. For example, free servers if you pay \$800k for a prime placement.
- Also, if you get free servers once, next time they'll try to push much more expensive deals onto you
- Govt and enterprise 20% off
- Edu - 40% off

## Services

Service	Audience	The Pitch	Pricing
	Consumers	exclusive content, software, contests Trying to monetize their users directly	10/mo
	Consumers	Use our easy media portal	Free
	Broadcasters	Get to those consumers. Used as carrot for broadcasters - exclusive content deals	variable
	Broadcasters	Let RN take care of messy web casting chores. Used as a low-cost carrot for Broadcasters. Uses linux servers	OD hosting for 1 mo, or 4 live events - \$12,000
<b>RNU</b>	Admins, Content Developers	Send your people to learn our technology... and be evangelized	\$1000-\$1500 per class
	Developers, Content Devs, ISPs	Support, software, training, and co-marketing benefits 4 tiers...top two are very exclusive and customized	Level 1 - free Level 2 - \$485 Level 3, 4 - ??
<b>Product support</b>	All	12 months of upgrades, PSS	40% of product price
	Broadcasters, Enterprise	Professional consulting makes Real tools do what you need. Integral part of many solutions	Custom
<b>Placements in products</b>	Broadcasters	Get a prime location on 155m desktops Realplayer, Realdownload, and RealJukebox	??
<b>Ads in content</b>	Advertisers	Advertise on the #1 media portal and hit your target. In their Web pages, streams.	??

Services perform key functions:

- Revenue generation - today, and increasingly crucial in the future.
- Evangelism - RNU, partner program
- "gap filling" for custom solutions - and all solutions are custom today
- Carrot for potential customers - "we'll Broadcast/advertise/place your content for free if you use our platform"

## Customer Segments At A Glance

		Analysis
<b>Enterprise</b>	<ul style="list-style-type: none"> <li>Represents 7% of current revenue</li> <li>Buy servers, hosting, and consulting services</li> <li>Customers often unwilling to pay for Real solutions</li> <li>Potential growth opportunity, but Real continually losing share</li> </ul>	<ul style="list-style-type: none"> <li>Real sells well-targeted and messaged solutions, not products</li> <li>Consulting, RBN, and partners are used to knit the products into solutions</li> <li>Impact on consumer/viewer is a consistent, immersive experience</li> </ul>
<b>Broadcaster (ICP)</b>	<ul style="list-style-type: none"> <li>Represents 24% of current revenue</li> <li>Buy servers and hosting services</li> <li>Almost none making money from streaming                             <ul style="list-style-type: none"> <li>Many Internet-only ICPs failing in dot-com shakeout</li> </ul> </li> <li>Limited growth opportunity. Real de-emphasizing</li> </ul>	
<b>Advertiser</b>	<ul style="list-style-type: none"> <li>Represents 18% of current revenue</li> <li>Buy inventory on Real.com, RealPlayer, and other properties</li> <li>Escalating efforts despite global online ad slowdown</li> </ul>	
<b>ISP/Hoster (CDN)</b>	<ul style="list-style-type: none"> <li>Represents 15% of current revenue</li> <li>Buy servers and consulting services</li> <li>Almost none making money from streaming</li> <li>Aggressively pursuing as potential growth opportunity</li> </ul>	
<b>Consumer</b>	<ul style="list-style-type: none"> <li>Represents 33% of current revenue</li> <li>Buy players and jukeboxes and subscriptions</li> <li>Bulk of revenue from Player Plus</li> <li>Success here drives all other segments</li> <li>Player download/sales viewed as saturated by analyst community, driving move to subscriptions</li> </ul>	
<b>E-commerce Sites</b>	<ul style="list-style-type: none"> <li>Insignificant current revenue</li> <li>Buy servers, hosting, and consulting services</li> <li>Potential for growth as dot-coms look to streaming to drive purchases</li> </ul>	

Gary Schare

Dave Fester (script)

Key Points:

- Drill into Broadcasters, ISP/Hosters, Enterprise and Consumers

# Enterprise Segment

## 1 Revenue Summary

	Q4 1998	Q1 2000	Q2 2000	Q3 2000	Q4 2000
Revenue	\$2,628	\$3,354	\$3,960	\$4,270	\$4,221
Operating	\$174	\$214	\$391	\$322	\$1,011
Operating	\$174	\$214	\$251	\$208	\$906
Total	\$2,078	\$3,782	\$4,512	\$4,870	\$46,140
Real Growth		27%	19%	8%	
% of total rev					7%

Source: Rates, Associates Estimates

### Analysis

- Dedicated enterprise sales force engages without Microsoft showing up
- But we're showing up much more often
- Continuing problems convincing enterprises to pay for solutions
- Often provide free software/services to win business
- Revenue growth slowing due to competitive and cost pressure

## 2 Key Market Data

- Total usage share: Real 41% vs WM 68% - Oct'00
  - Real's usage share down from Real 43% vs WM 45% - Apr'00
  - Neither vendor entrenched as most deployments are pilots or design wins
- Source: Digital Media Business Tracker 10/00

- Real follows OS, doesn't drive
  - Analysis perceive this chart to be 55% Windows, 45% Unix
  - Unix threat is serious, but future
- Source: Digital Media Business Tracker 10/00

## 3 Customer Wins/Losses

### Real Wins

- GE, Fedex, UPS, Goldman Sachs, Boeing, Boeing HP, Intel, Lockheed, Novell, Pac Bell, TI, U of Penn., U of Mich., Fed Govt (GSA, DOD, DOC, TVA)

### Real Losses

- Williams, CalTrans, AT&T, Bear Stearns, Int'l Paper, CSFB, Canadian Imperial Bank

### Fighting

- Applied Materials, Ford P&G, JP Morgan, Nike, Schwab, BWA, First Union

### Analysis

- When MS engages Real usually loses account
- Real often loses on price (Williams, NIST)
- Real occasionally wins on x-platform clients and servers
- None of Real's wins are truly entrenched, we can win most/all back

## 4 SWOT

### Strengths

- Enterprise sales consulting force
- Complete solutions
- x-platform server and client
- Price flexibility

### Weaknesses

- Desktop clutter/inference
- Server scalability
- Enterprise relation ship
- Platform solutions too expensive

### Opportunities

- Leverage Unix professionals on the server
- Migrate enterprise browser to RealNetworks
- Generate revenues to fund customer content efforts

### Threats

- MS out man's Real in field
- MS handles MC/SPE
- ASPs move toward MS due to channel conflict
- MS provides better web/intranet server integration

Real is very exposed in the Enterprise

- Channel conflict pushing ASPs to MS
- Sales force not making numbers
- Customers unwilling to write huge checks to Real
- MS shops choosing WM because it's part of the OS

Gary Schare

SM Starter Kit

**CAPTURE IT** Osprey 100 video-capture card, Labtec stereo headset/boom microphone

**CREATE IT** Terran's Cleaner 5: RealSystem Edition—Limited-time addition. Software for batch-encoding and advanced filtering capabilities

**RealProducer Plus**—Content-encoding software

**BROADCAST IT** RealServer Plus—Supports 60 simultaneous (sic) viewers

**Upgrades and Support**—A full year for each of your RealNetworks products (worth nearly \$1,000). This entitles you to updates as we continue to improve these products and also means that you'll be able to reach a RealNetworks technical support engineer by telephone should you have a problem or question.

# ICP Broadcaster and Consumer Ecosystem

**Consumer**

- 10 sales people
- \$63M (33% of total rev)
- Total growth currently at 4%
- Premium apps and services
  - PlayerPlus
  - JukeboxPlus
  - GoldPass
- Pitch player superiority
  - AV quality
  - Feature integration
  - Flash support

**ICP**

- 40 USA based sales reps
- \$90M (40% of revenue)
- Currently at 7% growth rate
- Free starter, then up sell
- Opportunistic structures
- Partners = 25% of ICP rev

**Advertising**

- 15 sales people
- 18% of rev

**Services**

- 17% of revenue
- RBN is \$14M (40 ICP reps)
- NSP is \$38M (35 USA reps)
- Resellers = 25% of NSP rev
- Focusing on new partners

**CDN Industry quotes**

- CDN partnership success caused RBN to languish
- Svr renewal price up to 8Xs
- Server growth appears as fewer sales and high prices
- CDNs oversold vs content that showed up, renewals will be hard

**Adv/Promo data points (past, not sustainable)**

Advertising	CPMs of \$10-50
Promotion	Top was \$100K / mo
Slotting fee	Top was \$10M

## Global Sales Snapshot

**Basic data points**

- 230 Sales people worldwide (7:1 vs DMD)
- SE ratio 1.2 or 1:3 to sales (similar to DMD)
- Focused sales investment
  - International (\$ new subs, +32% heads)
  - Partners (CDN capacity, ISVs)
  - Segments (OEM, Wireless, Embedded, Ent)
  - Revenue (Ad sales, Services, Enterprise)
- Rob "easing off" so people don't leave

**How they compete – in general**

- Opportunistic on pricing, structure, terms
- Leverage their strength, deals are one-sided
- Anything but MSFT recommended
- Force ASPs to RealWMM parity pricing

**How they compete - Enterprise**

- Direct engagement to close deals
- Primary media system for Sun, IBM, Linux, HP
- Follow the OS – path of least resistance

**How they compete – ICP/Consumer**

- Buy tier 1 ICP content exclusives – drives portal
- Offer tier 2 ICP reach and "one-stop-shop"
- 4 ICP rev sources: SW, SVS, ads, promo
- 2 cons rev sources: prem apps, subscriptions

**Sales SWOT**

Strengths	Opportunities
<ul style="list-style-type: none"> <li>▶ Partnerships with Sun (etc) offers leverage in sales resources</li> <li>▶ Leadership in player and site reach = business on their terms</li> <li>▶ One-Stop ICP services makes it easy to get involved</li> <li>▶ Able to charge premium rate for services over other SPs</li> <li>▶ Singular focus on Digital Media</li> </ul>	<ul style="list-style-type: none"> <li>▶ Re-build enterprise growth via Sun</li> <li>▶ Momentum in emerging and int'l markets with limited MS competition</li> <li>▶ Leverages emerging market momentum back to harder markets</li> <li>▶ Co-opts MCSP channel to divert W2K momentum</li> <li>▶ Escalate PC and device OEM deals</li> <li>▶ Continue to be "less scary than MS"</li> </ul>
Weaknesses	Threats
<ul style="list-style-type: none"> <li>▶ Channel loyalty low (competition)</li> <li>▶ 230 sales reps for global mission</li> <li>▶ Many partners, many are small</li> <li>▶ Often over-promise and under-deliver (poor execution)</li> <li>▶ Product issues               <ul style="list-style-type: none"> <li>▪ No DRM</li> <li>▪ WMT is better, cheaper opt</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Infrastructure partner attack RBN as competitor = eroded margins</li> <li>• ICPs reject Real as competitor</li> <li>• MS sales engages; win on cost/quality</li> <li>• Arrogance/poor execution continue</li> <li>• Loss internationally, a non-global player is a non-player</li> </ul>

**Real former employee opinions**

- MSFT successfully neutralized all Real infrastructure deals
- 85% share claims are meaningless/not true. But MS failed to refute
- Opportunity – Compare Real vs WMT ROI (Real loses)

Kurt Buecheler

1. By the end of this slide, you will understand that we are greatly out-gunned in sales resources. More than their 230 sales people (or 7:1 ratio to DMD), Real has established partnerships with Doubleclick, Sun, HP, IBM, Red Hat and other that extends their coverage to a much larger total sales force. If a Sun reps only identifies an opportunity
2. They structure their sale teams
- 3.
- 4.
- 5.

Speaker Notes...

## Partnerships, Acquisitions & Investments

### ① Partner strategy

#### Partner for "best of breed" component technology

- ▶ Intel codecs and RealPresenter (ppt)
- ▶ Sony codecs
- ▶ Intertrust DRM

#### Partner to coopt customer-facing technologies

- ▶ Apple (serves as origin server for Quicktime)
- ▶ Macromedia (flash integration into player)
- ▶ Microsoft (licensed MS Audio for RealPlayer)

#### Partner for ABM distribution

- ▶ AOL/Netscape
- ▶ SUN/SMHP (Unix)
- ▶ Red Hat (Linux)

#### Partner for non-PC device distribution

- ▶ Nokia (cell phones)
- ▶ Panasonic (portable players)

#### Partner for network distribution

- ▶ PanAmSat
- ▶ MCI
- ▶ Enron

#### Partner for major content

- ▶ Record labels - Blue matter

### ② Investment strategy

#### New initiative - first investment in December 1999

- ▶ Will leverage Accel for co-investment opportunities
- ▶ Typically do not need to invest cash because of distribution value and market position

#### Focus on core technology and infrastructure

- ▶ Areas critical to success and competitive advantage
- ▶ Value to tighter integration without assuming ownership

#### Recent Investments:

Investment Date	Company Name	Business Description	Deal Structure	Investment Size	ES
12/17/99	W engine	Developer of computer generated video and RealPlayer capable of internet ad campaigns for 3D on internet	Technology	\$10 million	30%
6/17/2000	Fast Forward Networks	Typing and management tool for internet	RealCash 1999 Technology	\$10 million	45%

### ④ Acquisition strategy

#### Acquire technology to fill strategic holes or enable core services

#### Use stock as primary acquisition vehicle

#### Recent acquisitions:

Investment Date	Company Name	Business Description	Deal Structure	Value (USD)
March 08 Via Software	Streaming media creation tools	FastForward	25% million	
August 08 On Demand	Content creation software	RealPlayer	\$75 million	
January 02 Realize	Internet content management and online commerce	RealPlayer	\$130 million	
July 02 M & J	Music systems integrator	RealPlayer	\$5.5 million	

## Partnerships and Alliances

### ① Key Partners

- AOL Real only in AOL6, Spinner (AOL in RealPlayer)  
Lots of Real content, AOL promo in RealPlayer
- Sun Sales: Streaming origin server, Unix Real Player (?)
- Unix Bundles with IBM, HP and RedHat
- Intel Codec development and RealPresenter (co-dev)
- Sony Codecs ranging from low-bit audio to high bit video
- Nokia Wireless streaming
- Apple Streaming Quicktime from RealServer
- Macromedia Flash integration

### ② Featured deals

- AOL To AOL \$20M, unlimited servers, free custom player with no RealPlayer branding, 100% ad rev To Real dist, marketing upgrade revenue(?)
- Sony To Sony Atrac3 above 64kbit, 328Kbit source std To Real RA <64kbit, embedded devices, content

#### MusicNet project (Code named "Havana")

Real as a Audio/Video service provider  
Target is serving Internet entertainment sites  
Competes with Alliance, Amplified, Rioprot

### ⑤ Real partner quotes

- "I perceive them to be forceful, sneaky, and backhanded"
- "It's a tightly run org - Run militarily"
- "GIGANTIC push to obtain (pay) for content in Gold Pass"

### ③ Partnership SWOT

Strengths	Opportunities
<ul style="list-style-type: none"> <li>• Nokia deal gave Real 30% of market and thought leadership</li> <li>• Nokia proposed Real as WAP standard, adopted for EPOCH</li> <li>• Early momentum in market share and advertising</li> <li>• Large base of ICP content is an asset and leg</li> <li>• Juicebox ships widely with MP3 devices (incl. cell phones)</li> </ul>	<ul style="list-style-type: none"> <li>• Leverage Sun, IBM, HP relationships with telecos</li> <li>• Standards bodies activity, including 3G, Bluetooth, W3C (for SMIL)</li> <li>• Get Real embedded in Nokia's infrastructure products</li> <li>• With ASP's, build digital media solutions with bandwidth-free capability</li> <li>• Acquire PacketVideo or SolidStreaming</li> </ul>
Weaknesses	Threats
<ul style="list-style-type: none"> <li>• Real competes with CDNs and ASPs with RFP</li> <li>• Real competes with ICPs with CoMPass</li> <li>• No DRM solution built-in</li> <li>• No embedded version of REAL player yet</li> <li>• Acquisitions harder (low stock)</li> <li>• REAL codecs are proprietary</li> </ul>	<ul style="list-style-type: none"> <li>• Topology strength varies by locale</li> <li>• Uneven effort to train, support and engage SP/ASV</li> <li>• ASPs see MSFT as better partner/ROI</li> <li>• Existing Microsoft relationships with major telcos - Vodafone, Telefonica, BT, T-Mobile, NTT DoCoMo etc</li> <li>• "Standards" e.g. MPEG4</li> <li>• Cell will support only one player</li> </ul>

### ④ Int'l Partners

	Spain	Russia	US	ASPs	BT/Telecom	DMC/SPs	Emulation	Advert	DBM
EMEA	4	12	20	15	12	0	5	8	0
SPAR	3	30	57	23	9	0	5	5	0

## Marketing Overview

### ① Marketing Organization

Marketing FOC & Budget	Real	Microsoft
Media Services	40	22
Consumer Products (PC)	35	5
International	30	1
Professional Services	10	0
Consumer Appliances (Non-PC)	5	1
E-Commerce	5	1
<b>Total Marketing Headcount</b>	<b>125</b>	<b>30</b>
<b>Total Marketing Budget</b>	<b>\$36M</b>	<b>\$10.5M</b>

### ② PR Summary

- News: Moved from "darling" to neutral coverage
  - Business press, tech trade coverage predominates
  - Little pickup by consumer, music/entertainment pubs
- Reviews: Fewer reviews (and fewer wins) than WM in CY00
  - RealPlayer: 6 Win, 3 Tie, 5 Loss
  - WM Player: 15 Win, 6 Tie, 4 Loss
  - RealSystem: 3 Win, 5 Tie, 3 Loss
  - WM Tech: 8 Win, 4 Tie, 2 Loss
- Analysts: still consider Real the pioneer/leader in streaming media space though doubts are surfacing
  - Doubts include: worth of subscription service, s/w business, overall competitiveness over longer term

### ③ Brand/Advertising

- Brand identity is strong and well-implemented
- Unaided low, but overall awareness growing rapidly
  - Unaided only 10% (WM at 5%)
  - Total up from 30 to 41% since 4/00<sup>1</sup> (WM at 54%)
- Do not dominate the market in consumers' minds
  - 11% of users site Real as brand leader (WM 10%)
- Print ads for business/industry, online for consumers
  - Spent \$2.1M on print<sup>2</sup>, \$2.5M online<sup>3</sup> last year

Source: <sup>1</sup>DMD Consumer Tracker 4/00 <sup>2</sup>Ad Reference <sup>3</sup>CMP Intertrack

### ④ Events/Keynotes

- Budget of \$10M (vs. MS-DMD \$2.1M)
- Participate in approx 65 shows per year
  - Largest presence at NAB, Int'l World, SM East/West (Keynote), Comdex, Dig Hollywood (Keynote)
- Annual Real Conference (3 days) - \$3.2M budget
  - \$500K in sponsorships, \$700K exhibit fee recovery (~60 exhibitors), \$1M reg. recovery, \$1M own costs
  - Sponsors included: Sun, HP, Intel, Oracle, Lotus

### ⑤ RealPartner Programs

- 4 Tier program (all start at 1 with \$495 fee)
  - Levels 1 & 2: web enrollment
  - Levels 3 & 4 (top): managed by 10 Reps
- 485+ partners in program, vs 450 for MS
- Benefits
  - Account managers for top partners (10 for level 3/4)
  - Web resources, training, support: real-conference

Gary Schare

Dave Fester (script)

Key Points:

- Substantial marketing headcount and budget compared to MS, but they lack some of the infrastructure that we can leverage
- PR tide has turned against them somewhat; MS product improvements, combined with business sustainability doubts beginning to show in coverage
- Very usable brand, but awareness still quite low
- Huge event spend and very successful yearly conference; MS can leverage corp presence and events (teched), but Real looks "dedicated" to digital media
- Partners at this point have little loyalty to either of us from a program stance. While they are providing status-quo with partners, we have the opportunity and experience to win with a long term vision for partners by putting the necessary resources and focus on partners as our extended selling force. The benefit of doing this is winning partner loyalty, trust and hearts. By not doing it, Real can turn on a dime, focus on partners and kick our tail in this space.
- The partner space is one area where with a little more focus and resources, we could claim victory.

### Advertising/Brand Strategy

- Brand identity is strong
  - Logo clear, clean, readily identifiable

Continued from previous slide...

- Advertising consistently reinforces the same look and feel, both in online and print
- However, Real does not dominate the market in consumers' minds
  - Only 10% of web users characterized Real as a brand leader (vs. 11% for WM, 23% for MP3)\*
  - Ranked #2 in selection of content (behind MP3), #4 in video quality (behind WM, QT, MP3), and #4 in sound quality (behind MP3, WinAmp, WM)\*
  - Only 45% of users are highly satisfied with Real Player (vs. 33% for WMP, 55% for QT)\*
- They use print advertising to reach business and industry, and online advertising to reach their end users
  - Print advertising
    - Spent \$2.1MM last year, primarily targeted to business (including Business 2.0, Wall Street Journal, Industry Standard, Wired, and Red Herring) and industry (Billboard and Information Week)\*\*
  - Online advertising
    - Spent \$2.5MM last year, primarily on music, news, sports, and portal sites\*\*\*

## **Campaign Analysis: Real 8 Launch**

- Launched Real Entertainment Center on May 22, 2000. Consisted of Real Player 8, Real Jukebox 2 and Real Download 4.
- Ran full-page print ad on launch day in the Wall Street Journal, New York Times, and other papers.
- Messaging focused on: only "all-in-one" integrated suite, best quality audio and video playback and overall market leadership.
- Claimed 135M registered Players & 35M Jukeboxes in 2 months
- Claim to achieve 200,000 new Player users every day

Political & Policy Strategy	
<p><b>Strengths</b></p> <ul style="list-style-type: none"> <li>Credible Senate champion</li> <li>Potential "victim" image</li> <li>Welcome in anti-MS alliances (SIIA)</li> <li>"Progressive" image to media</li> <li>Politically active execs</li> <li>Positive philanthropic image</li> </ul>	<p><b>Opportunities</b></p> <ul style="list-style-type: none"> <li>Convince fed, state, and intl authorities to prohibit "tying" of DND into OS</li> <li>Weaken MS by supporting anti-MS coalition efforts</li> <li>Encourage litigation against MS, regulatory restraint (or protection of Real)</li> <li>Avoid merger and regulatory scrutiny by portraying Real as threatened by MS (ala Netscape and AOL)</li> </ul>
<p><b>Weaknesses</b></p> <ul style="list-style-type: none"> <li>No consistent DC or state cap presence (until May 01)</li> <li>Partisan</li> <li>Image problem re privacy</li> <li>"Loose Cannon" execs</li> </ul>	<p><b>Threats</b></p> <ul style="list-style-type: none"> <li>Privacy complaints threaten underdog image</li> <li>Subject to political and regulatory problems as content provider</li> </ul>

Why do I care about this slide BECAUSE

Speaker Notes...

Move out standards and patent stuff...

Glaser testified against Microsoft before Senate Judiciary in July 1998 and lobbied Sen. John Kerry on a February flight from Davos. He may also be in contact with Senator Hatch to allege anti-competitive integration of Media Player. Becoming a more active member of SIIA.

Maria Cantwell Positions held

- Vice President of Marketing
- Consumer Affairs Executive
- Senior Vice President of the consumer and e-commerce division

Continued from previous slide...

#### Political Activity

Promotes laws to protect internet privacy.

Supports expanded immigration visas for foreign workers.

Successfully opposed the "Clipper Chip", a Clinton administration proposal that raised privacy concerns.

Didn't adopt a trademark issue during her two terms in the legislature.

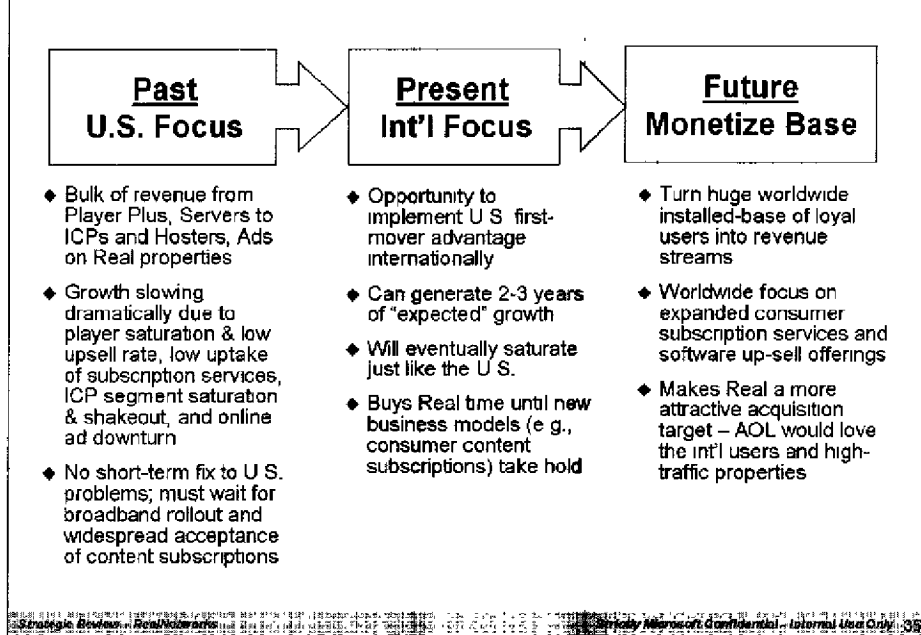

Campaigned for then Sen. Alan Cranston, D-Calif., in his bid to win democratic party nomination for president in 1983.

Elected to the Washington state Legislature in 1986.

Elected to the 1<sup>st</sup> Congressional District in 1992.

Voted out of Congress in 1994.

## How Real Will Grow

Rich Lappenbusch

Rich Lappenbusch (script)

## Comparative Strengths & Weaknesses

<p><b>What does Real do well?</b></p> <ul style="list-style-type: none"> <li>▶ Gaining content into their format</li> <li>▶ Getting players distributed</li> <li>▶ Dedicated focus on digital media</li> <li>▶ Partner with ABM</li> <li>▶ Staffing to meet market demand</li> <li>▶ Integrating other company's code</li> <li>▶ Managing public and press perception</li> <li>▶ Cross-platform</li> <li>▶ Ship rapidly and consistently</li> <li>▶ Providing End-to-End solutions</li> <li>▶ MP3 and other standards alignment</li> </ul>	<p><b>What does Microsoft do well?</b></p> <ul style="list-style-type: none"> <li>▶ Enterprise sales &amp; marketing</li> <li>▶ Digital Rights Management technologies</li> <li>▶ Bring the Microsoft name to the table</li> <li>▶ Write more stable and usable software</li> <li>▶ Invest in strategic relationships</li> <li>▶ Demonstrate platform leadership (PocketPC, STB)</li> <li>▶ NET leadership</li> </ul>
<p><b>Where is Real exposed?</b></p> <ul style="list-style-type: none"> <li>▶ Revenue growth slowing</li> <li>▶ Competing with partners and customers</li> <li>▶ Relying on 3<sup>rd</sup> parties for core technology</li> <li>▶ Organizational health employee compensation</li> <li>▶ Privacy concerns</li> <li>▶ Enterprise credibility</li> <li>▶ Market valuation</li> <li>▶ Users hate "desktop clutter"</li> </ul>	<p><b>Where is Microsoft exposed?</b></p> <ul style="list-style-type: none"> <li>▶ Product ship cycles and lead time</li> <li>▶ Limited cross-platform support</li> <li>▶ Not perceived by public as focused on DM</li> <li>▶ Public policy via ABM attacks</li> <li>▶ Low brand awareness around DM</li> <li>▶ Very late to launch digital media services</li> <li>▶ MP3 and standards alignment</li> </ul>

## Issues And Recommendations – Global Sales & Marketing

	RECOMMENDATIONS	
INVEST IN INTL SALES/MARKETING OF DIGITAL MEDIA	<p>Issue: Market believes Real= Streaming Media</p> <p>Need increased mind share</p>	<ul style="list-style-type: none"> <li>• Include WMT as core Jihad inside of Whistler roll out</li> <li>• Get digital media metrics on the subs GM scorecard</li> <li>• Include WMT metric in NSG, IBC, EPG business group objectives and initiatives.</li> </ul>
OPEN UP PLATFORM AND PROMOTE EASY INTEGRATION	<p>Issue: Real challenging desktop and emerging platforms</p> <p>Need coverage of developing market</p>	<ul style="list-style-type: none"> <li>• Build OEM customization and branding pack</li> <li>• Integrate WMT into wireless engagement jihad</li> <li>• Fund "WMT" inside program for co-marketing and WMT brand awareness</li> </ul>
DEEP NSN INTEGRATION	<p>Issue: Real "buying" tier 1 content at prices for which we can't compete</p> <p>Need fight battles we can win on our terms</p>	<ul style="list-style-type: none"> <li>• Win the corporate segment to protect and expand engagements.</li> <li>• Win International markets so we are competing with a less-than-global company</li> <li>• Let the content battle continue with low investment as a war of attrition</li> </ul>
PUBLIC POLICY	<p>Issue: Streaming not easy to implement in LOB operations</p> <p>Need greater solution and partner base</p>	<ul style="list-style-type: none"> <li>• Build sample application 'jumpstart packs' targeted at vertical industries.</li> <li>• Establish global MCS SWAT team specific to WMT/Digital media. Establish/ train certified WMT ISV channel</li> <li>• Create and fund WMT good housekeeping seal with application testing and porting centers</li> </ul>

Rich Lappenbusch

Top Points made on this slide (Points form understanding-leading to conclusions later)

- 1.
- 2.
- 3.
- 4.
- 5.

Why do I care about this slide BECAUSE

1. Microsoft has little ongoing effort in understanding RealNetworks as a competitor and how they collaborate with our other competitors. Establish a point of contact to track competitive wins & losses and benchmarking with RealNetworks. Empower that person to call strategic ad-hoc meetings to discuss changes in marketplace and competitive landscape.
  - Not a once-a-year activity. We need to understand, react and engage near real-time.
2. Internal coordination – business modeling, service design, go to market, partnering and messaging must be coordinated among MS groups to fight Real + MS Competitive threats and maximize MSFT revenue. MSN monitors RN's shift in emphasis to content derived revenue services.
  - Windows marketing and International GMS recognize how they can use WMT to get into UNIX accounts.
  - Expose their privacy violation, in forwarding enterprise server maps..
3. Guide becomes format neutral content guide site
4. Content guide site open to all formats that promotes WMF files first in prio sort
4. Market approach - should target content providers at low end of the market
5. Industry needs standard for DRM
  - DRM IP Peace

Issues And Recommendations – Extend Platform		
	KEY ISSUES	RECOMMENDATIONS
INVEST IN INT'L SALES/MARKETING OF DIGITAL MEDIA	<ul style="list-style-type: none"> <li>Real is aggressively enabling solutions and embedded streaming devices that we can't match</li> <li>Real builds more complete end-to-end solutions that Microsoft does</li> </ul>	<ul style="list-style-type: none"> <li>License <del>origin</del> servers for devices</li> <li>Allow third party cache/proxy servers</li> <li>Work with partners to build solutions (for example, content production, serving, network management, and Ecommerce)</li> </ul>
EXTEND PLATFORM AND PROMOTE EASY INTEGRATION	<ul style="list-style-type: none"> <li>Real has a much better universal, rich interactive platform, so they can reach all mac and windows machines with rich advertising and content</li> <li>Real's platform is easier to develop for – there's one all-encompassing client with few incompatibilities between versions so there are no browser/platform issues</li> </ul>	<ul style="list-style-type: none"> <li>Beef up (maybe) Unix, CE and (crucially) Mac client efforts currently only X people on it. Since our platform includes the shell, we would need to improve cross-platform browser support.</li> <li>Engage Internet Explorer team – we cannot beat real in this area without a richer Mac IE – SMIL, flash, scripting</li> <li>Internally need to engage Dev tools and windows to produce a rich media development tool that integratesw ??</li> </ul>
DEEP MSN INTEGRATION	<ul style="list-style-type: none"> <li>Real uses RBN to gain scale for radio, video offerings</li> <li>Real's consulting services allow them to build out-of-box streaming solutions we can't match</li> </ul>	<ul style="list-style-type: none"> <li>Create most attractive CDN feeder/manager for premiere content partner</li> <li>Build and promote NET media services in the player and platform</li> <li>Create consulting services to help partners implement our products/services</li> </ul>
PUBLIC POLICY	<ul style="list-style-type: none"> <li>Microsoft DRM, potentially a huge advantage, isn't getting much traction in the industry</li> </ul>	<ul style="list-style-type: none"> <li>Build template Ecommerce solution to show partners how makes DRM experience better</li> <li>Need an MCS SWAT on DRM</li> </ul>

Rich Lappenbusch

## Issues And Recommendations – Deep MSN Integration

	KEY ISSUES	RECOMMENDATIONS
INVEST IN SALES & MARKETING OF DIGITAL MEDIA	<ul style="list-style-type: none"> <li>Real has built a world class rich media portal that they are already starting to monetize with their GoldPass subscription service</li> </ul>	<ul style="list-style-type: none"> <li>MSN offers a worldwide localized media portal that offers best of breed music, films, and games in all major media markets, languages</li> <li>Integrate MSN Movies, MSN Music, Zone, and Windows Media.com into a single easy to browse rich media environment, not just more channels</li> <li>MSN offers subscription media services</li> </ul>
OPEN UP PLATFORM AND PROMOTE EASY INTEGRATION	<ul style="list-style-type: none"> <li>As rich media content and related portals dominates more and more of the user's daily experience, users will gravitate toward rich media portals and our brand relationship (Windows and MSN) will erode</li> </ul>	<ul style="list-style-type: none"> <li>Focus our media efforts on broad distribution services, not production</li> <li>Build the alternative for all to the AOL/TW+Real distribution system</li> <li>Build strong distribution partnerships with labels and studios</li> <li>Market this new distribution service aggressively to consumers</li> <li>Tightly integrate Mars with MP and all other content services</li> <li>Promote and integrate MSN media and services in the player experience</li> <li>Promote third party channel file optimizations for WMT and .NET</li> <li>Invest in content delivery services now: Move faster on MSN Music, Movies</li> <li>Design interfaces that Real cannot steal MIME types in Mars</li> </ul>
DEEP MSN INTEGRATION	<ul style="list-style-type: none"> <li>We are relatively late to market when we launch digital media services</li> </ul>	<ul style="list-style-type: none"> <li>Recognize cost of arriving late to market and look to next generation of content services we can leapfrog them (DRM, P2P location services)</li> <li>Executive commitment to understand the media industry</li> <li>Create the leading movie vertical as a bridge to a broadband movie marketplace</li> </ul>
	<ul style="list-style-type: none"> <li>Real has broad international reach</li> </ul>	<ul style="list-style-type: none"> <li>MS-wide commitment to Windows Media worldwide including US</li> <li>MSN programs high quality media guides into MP &amp; browser for WW markets</li> <li>Get on the GM scorecard in the subsidiaries for promotion of player</li> <li>Focus on international promotion of the MP on the MSN &amp; MS.com sites</li> <li>Drive upgrades off Microsoft.com cover page in all major European markets</li> <li>Create mobile media optimized content portal</li> </ul>
	<ul style="list-style-type: none"> <li>Media is still too difficult to find</li> </ul>	<ul style="list-style-type: none"> <li>Optimize MSN for media searches prioritizing WMF and subscription content</li> <li>Tune the OS to offer proactive approach to media availability alerts by personal choices (MSNBC, NewsAlert)</li> </ul>
PUBLIC POLICY	<ul style="list-style-type: none"> <li>Preferred content relationships (e.g. special and deep marketing advantages including</li> </ul>	<ul style="list-style-type: none"> <li>We want media launch time advantage to drive format adoption and consumer usage. Highest degree of consumer interest in new content</li> <li>Build solid relationships with content producers so they push while we pull</li> </ul>
<p><b>Invest in new WMF optimized programming for MSN media services</b></p>		

Rich Lappenbusch

Top Points made on this slide (Points form understanding-leading to conclusions later)

- 1.
- 2.
- 3.
- 4.
- 5.

### Why do I care about this slide BECAUSE

- Real has built a world class rich media portal that they are already starting to monetize with their GoldPass subscription service
- MSN offers a worldwide localized media portal that offers best of breed music, films, and games in all major media markets, languages
- Integrate MSN Movies, MSN Music, Zone, and Windows Media.com into a single easy to browse rich media environment, not just more channels
- MSN offers a subscription media service
- As rich media content and related portals dominates more and more of the user's daily experience, users will gravitate toward rich media portals and our brand relationship will erode resulting in negative impact on Windows and MSN brands
- Focus our media efforts on broad distribution services, not production
- Build the alternative for all to the AOL/TW+Real distribution system
- Build strong distribution partnerships with labels and studios
- Market this new distribution service aggressively to consumers
- Tightly integrate Mars with MP and all other content services
- Promote and integrate MSN media and services in the player experience
- Invest in content delivery services now: Move faster on MSN Music, fund MSN movies
- Design interfaces that Real hijack MIME types in the Mars
- Real has a broad reach now and is growing internationally very fast
- MS-wide commitment to Windows Media worldwide including US
- Build high quality media guides into MP and browser for all major markets and related languages (26 today)
- Get on the GM scorecard in the subsidiaries for promotion of player
- Focus on international promotion of the MP on the MSN & MS.com sites
- Drive upgrades off Microsoft.com cover page in all major European markets especially Sweden, Italy, and Netherlands
- Create mobile media optimized content portal
- Real uses RBN to gain scale for radio, video offerings
- Create most attractive CDN feeder/manager for premiere content partners and selected events

Continued from previous slide...

- Use Windows Update Infrastructure as
- Create consulting services to help ISPs adopt and implement our products and services.
- Promote .NET services in the player and platform
- Media is still too difficult to find      Optimize MSN for media searches prioritizing WMF and subscription content.
- Tune the OS to take proactive approach to media availability alerts by personal choices (MSNBC, NewsAlert)
- We are late to market when we launch digital media related services      Recognize cost of arriving late to market and look to next content services we can leapfrog them (DRM, P2P location services)
- Create the leading movie vertical as a bridge to a broadband movie marketplace
- Why are we always so late to commit commitment at high level, too much time spent on education of execs. vs proposal. Rob doesn't need to be educated, he wants to move fast, no afraid to trial, 5 people a year ago, vs. trying to play catch up later.
- Executive commitment to understand the media industry
- Promote third party channel file optimizations for WMT and .NET (filmspeed, rolling stone, etc.)
- Preferred content relationships (e.g. special and deep marketing advantages including      We want media launch time advantage to drive format adoption and
- New stuff has higher degree. First week preview only in WM, Build set of exclusive programming on MSN promoting WMF optimized events and content. (MSNBC live, NSYNC, etc.)
- Build solid relationships with content producers so they push

### Issues And Recommendations – Public Policy

	KEY ISSUES	RECOMMENDATIONS
INVEST IN SALES & MARKETING OF DIGITAL MEDIA	<ul style="list-style-type: none"> <li>Real is masterful at managing public perception of the digital media space</li> </ul>	<ul style="list-style-type: none"> <li>Commit people, money, resources, services to capture mind share and establish Microsoft as a leader in digital media technology development and format usage</li> <li>Develop and strengthen relationships with industry coalitions</li> </ul>
OPEN UP PLATFORM AND PROMOTE EASY INTEGRATION	<ul style="list-style-type: none"> <li>MS has opportunities to join industry-wide efforts to promote policy on content regulation and other priorities</li> </ul>	<ul style="list-style-type: none"> <li>Highlight industry cooperation of policy (e.g. content regs)</li> <li>Encourage Real &amp; competitors to work for pro-industry policies</li> <li>Focus on making technology available to key influencers asap</li> </ul>
DEEP MSN INTEGRATION	<ul style="list-style-type: none"> <li>Real appears to be preparing a policy and political campaign to encourage federal, state, and international law enforcement to prohibit the integration of DMD into Windows and/or encourage regulatory oversight over MS</li> <li>Real is opening a government affairs office in DC Spring 2001</li> </ul>	<ul style="list-style-type: none"> <li>Apply lessons from Netscape and DCU political campaign</li> <li>Educate lawmakers, elites, and third parties on industry technology, history of MS and Real competition and consumer value of integrated features in OS</li> <li>Define Real as aggressive competitor, debunk "victim" status image, and expose privacy problems through third parties and grassroots campaigns</li> <li>Utilize rapid response team to discourage distortion campaign</li> <li>Engage friendly trade associations and partners to tell our story early, highlight efforts to work together on common industry interests</li> <li>Allow Real to marginalize itself politically (i.e. let Rob be Rob)</li> <li>Work with PR to frame political and policy issues for general public</li> </ul>
PUBLIC POLICY	<b>Anticipate anti-MS political campaign and promote pro-industry policies</b>

## Quotable Quotes

"Our experience shows it growing a lot faster than that. 12 months ago Real was 90% of our audience and MS 10%. Today the opposite is true. Locally MS have been very active in encouraging take up of the product whilst Real don't seem to know whether they are a software, services or media company and are leaving a trail of confusion behind them"

-- Jim Stewart, whoopi.net, Australia

"Real has not convinced me at all that they will succeed in penetrating the international market. In fact, we are telling all of our clients to avoid Real stock at all costs. We believe their only hope right now is to be bought out by someone like AOL. Although, I have yet to hear any solid rumors on that front"

-- Analyst Merrill Lynch

Top Points made on this slide (Points form understanding-leading to conclusions later)

1 Here is a SWOT analysis:

### Strengths

1. Real is setting standards – few ICPs feel they can offer a credible streaming service without offering Real and many are exclusive to Real. Also, there are more ICPs using SMIL than almost any MS web-based standard. SMIL is the standard for synchronizing streaming media and text.
2. Real has created a more open platform than MS – by supporting more clients (excellent Mac has been very important for winning over the entertainment industry) and more servers (Solaris, Linux, HP Unix), and offering a more plug-able interface so AAC, Liquid, QuickTime, Flash and InterTrust
3. The Real iQ System, announced 12/11, is supported by the who's who of the streaming biz and the ABM crowd. Akamai Technologies, Deutsche Telekom, Digital Island, Enron Broadband Services, IBEAM, Intel IMS, Madge.web, Mirror Image Internet, NET-36 (a PamAmSat Company), and Speedera. Technology companies supporting RealSystem iQ include Adobe Systems, Avid Technology, CacheFlow, EMC, F5 Networks, Hewlett Packard, IBM, Inktomi, Intel, Lucent Technologies, Macromedia, Network Appliance, SecureMedia, and Sun Microsystems. AOL and Apple provided quotes.
4. Another strength is Real's participation in the ABM consortium and industry organizations <not my points so I don't have a lot to say>

Continued from previous slide

#### **Weaknesses**

1. 4. Real's business model to get to its current position has moved from being a strength to a weakness. As most of its customers are under severe financial pressure, Real's competitive nature is working against it.
2. It has alienated customers with its sharp business practices and support for MP3.

#### **Opportunities**

1. Real needs to partner in the consumer space to take its business model to the next level. AOL is an obvious choice, but also Bertelsman or any major label or studio.
2. Further collaboration with ABM to establish standards is another opportunity.

#### **Threats**

1. Real could lose users to continued privacy problems
2. To the extent streaming becomes part of the operating system -- either WM formats, QuickTime or MPEG4 -- it will make it hard for Real to charge separately for software and content promotion

Why do I care about this slide BECAUSE Real is vulnerable to extent it cannot set standards or extract a tax from its business model.

Speaker Notes .

#### **Place in other Policy slide:**

Glaser testified against Microsoft before Senate Judiciary in July 1998 and lobbied Sen. John Kerry on a February flight from Davos. He may also be in contact with Senator Hatch to allege anti-competitive integration of Media Player. Becoming a more active member of SIIA.

Maria Cantwell Positions held

Vice President of Marketing  
Consumer Affairs Executive  
Senior Vice President of the consumer and e-commerce division

#### **Political Activity**

Promotes laws to protect internet privacy.  
Supports expanded immigration visas for foreign workers.  
Successfully opposed the "Clipper Chip", a Clinton administration proposal that raised privacy concerns.  
Didn't adopt a trademark issue during her two terms in the legislature.  
Campaigns for then Sen. Alan Cranston, D-Calif., in his bid to win democratic party nomination for president in 1983.  
Elected to the Washington state Legislature in 1986.  
Elected to the 1<sup>st</sup> Congressional District In 1992.  
Voted out of Congress in 1994.

## Marketing Expense Breakdown

### Key Findings

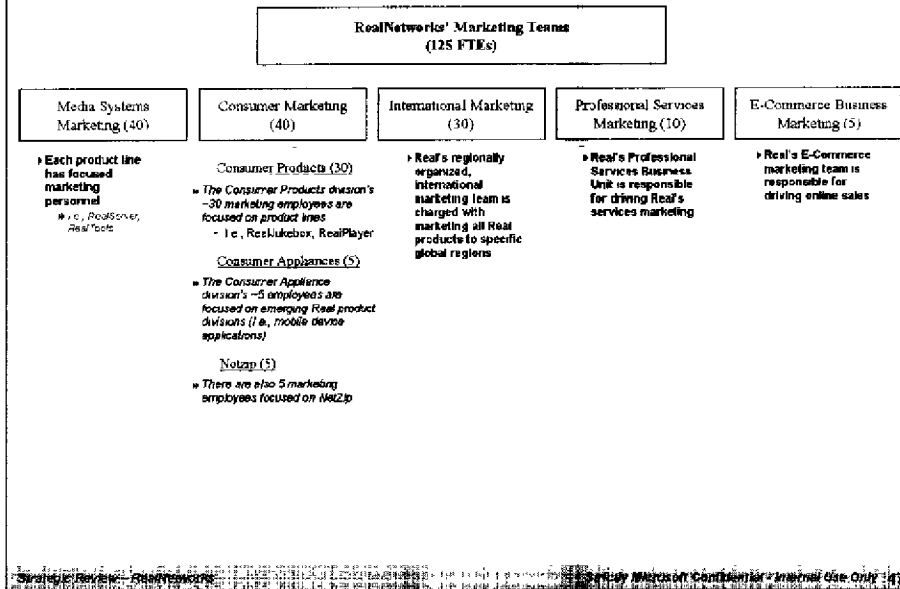

- Real spent approximately 42% of its net revenues on marketing in the past four quarters, approximately a 100% increase from the same time period the previous year (Q4 1998 – Q3 1999)
- Real's increase in marketing expense over the previous four quarters is primarily due to 4 factors:
  - The hiring of additional marketing FTEs
  - Additional consulting and market research expenses
  - Increased advertising costs
  - RealConference and RealConference Europe expenses
- Real's \$60MM dollar marketing budget in the previous four quarters can be broken into three categories
  - Advertising (~\$20MM)
  - Events and Tradeshow (~\$10MM)
  - Other\* (~\$31MM)

### WW Overall Marketing Expenses

	Q4 1999	Q1 2000	Q2 2000	Q3 2000	Total Q4 1999 – Q3 2000
Total Marketing Expenses	\$10.8MM	\$14.7MM	\$17.6MM	\$17.9MM	\$61MM

\* Other includes: salaries and personnel costs, consulting and market research fees, cost of marketing collateral

## Marketing Headcount Breakdown

## Standards Organizations Strengths & Weaknesses

<p><b>Real's Strengths:</b></p> <ul style="list-style-type: none"> <li>▶ 3GCF             <ul style="list-style-type: none"> <li>» <i>New organization co-founded by Nokia &amp; Ericsson</i></li> <li>» <i>Last meeting was hosted by Real in Seattle</i></li> <li>» <i>Real is pushing for use of IETF Standards</i></li> <li>» <i>Real technology to be developed for Nokia phones</i></li> </ul> </li> <li>▶ SMPTE             <ul style="list-style-type: none"> <li>» <i>Some discussion of using Real's technology for high quality digital cinema applications</i></li> </ul> </li> </ul>	<p><b>Microsoft's Strengths</b></p> <ul style="list-style-type: none"> <li>▶ 3GCF             <ul style="list-style-type: none"> <li>» <i>Newly announced relationship with NTT DoCoMo to deploy Windows Media Technologies (WMT) in cell phones gives Microsoft a strong presence in mobile world</i></li> <li>» <i>Pending deal with Ericsson to adopt WMT will further enhance Microsoft presence.</i></li> </ul> </li> <li>▶ MPEG             <ul style="list-style-type: none"> <li>» <i>ITU-T advanced video experts group (chaired by Gary Sullivan) may submit its new H.26L technology to MPEG for testing</i></li> </ul> </li> </ul>
<p><b>Real's Weaknesses</b></p> <ul style="list-style-type: none"> <li>▶ 3GCF             <ul style="list-style-type: none"> <li>» <i>Real has been passive in meetings and is not taking a leadership role</i></li> </ul> </li> <li>▶ MPEG             <ul style="list-style-type: none"> <li>» <i>Real has attended only 1 meeting</i></li> <li>» <i>Together with Intel, asked MPEG to adopt RealVideo 8 without alteration (not standard procedure)</i></li> </ul> </li> <li>▶ SMPTE             <ul style="list-style-type: none"> <li>» <i>No real traction</i></li> </ul> </li> </ul>	<p><b>Microsoft's Weaknesses</b></p> <ul style="list-style-type: none"> <li>▶ 3GCF             <ul style="list-style-type: none"> <li>» <i>Microsoft is strongly outvoted on proposals for a framework agreement and confidentiality rules</i></li> <li>» <i>Nokia dominates the proceedings; Microsoft's relationship with Nokia is weak</i></li> </ul> </li> </ul>

Strategic Review: Real Networks | Confidential - Internal Use Only | 10

## Revenue Mix

### Q2 Revenue Breakdown

### 2Q Analysis

Consumer licensing down as percentage of revenues from Q1 (38%) due to launch

Systems and CDNs accounted for most of licensing revenue growth

Advertising revenue up 41% from Q1, now accounting for 19% (up from 16%)

Services revenue up 17% from Q1

# Wireless

## ① Key points

- Digital Media is seen as a killer application for 3G wireless networks
  - Binary decision – most cell phones will only support one digital media player
- Nokia/Real deal has gained thought leadership
  - Nokia dominates worldwide cell phone market with 30% market share & 24% margins
- Real wireless development team in place with high levels of secrecy
  - Real has close partnerships with the major telco system integrators, all of whom have strong relationships with many cellular carriers
    - Sun, IBM, HP
- Real looking for wireless investments/acquisitions
  - E.g. SolidStreaming (NY start-up, focused on wireless streaming solutions) (source: VC investor)

## ② Top wireless device manufacturers

Manufacturer	Digital media solution
Nokia	Real Player for EPOC smart phone, proposed G2 as Bluetooth standard
Norocis	TBD
Ericsson	Microsoft for feature phone (90% of sales), EPOC smart phone TBD
Panasonic	Microsoft for Japan, rest TBD
Samsung	GEO for streaming video feature phone, MP3 for music phone, Microsoft for smart phone

## ③ Top wireless carriers

Carrier (in order of subscriber numbers)	Use Sun, IBM or HP?	Digital media solutions
Vodafone Group (25 countries) – incl. Verizon, Vodafone, Mannesmann, Omnicell – 10m	Yes	Microsoft, Real, PV in trial
NTT DoCoMo (Japan) – 33m	Yes	Microsoft launch 00
Orange (emirs) – 32m / 5m 11m	Yes	Strong preference for Linux
T-Mobile Germany UK & US 26m	Yes	Microsoft, Real, PV in trial
Telcelur (India Mobile) – 21m	Yes	Microsoft, Real, PV in trial
France Telecom (France UK) 21m	Yes	Strong preference for Linux
Telefonica (Spain & AT&T) 20m	Yes	Microsoft in TFM, Real in Tetra (SP), PV in Tetra Mobile
AT&T Wireless – 12m	Yes	No plans yet
SK Telecom (Korea) – 11m	Yes	MPEG4/GE2 solution
J-Phone (Japan) – 9m	Yes	Microsoft planned launch 2002

## ④ Wireless SWOT

Strengths	Opportunities
<ul style="list-style-type: none"> <li>• Nokia commitment</li> <li>• Availability of Unix servers today (standard infrastructure in European and Asia-Pacific telcos)</li> <li>• Jukebox ships widely with MP3 devices (incl. cell phones)</li> <li>• Seen as promoting industry standards (e.g. SMI)</li> <li>• Lots of content. Web phones ultimately need to play content from the Internet</li> <li>• Strong presence in each European country (16-person teams)</li> </ul>	<ul style="list-style-type: none"> <li>• Leverage Real integration partners, e.g. Sun, IBM, HP, who already have strong telco relationships</li> <li>• Get Real embedded in Nokia's (and others') infrastructure products</li> <li>• Acquisition of embedded wireless player e.g. PacketVideo, SolidStreaming</li> <li>• Standards bodies activity including 3GPP (founding member), Bluetooth (supported by Nokia), MPEG (for SMI)</li> </ul>
Weaknesses	Threats
<ul style="list-style-type: none"> <li>• No embedded version of REAL player yet</li> <li>• Server pricing high</li> <li>• Depressed stock price makes acquisitions harder</li> <li>• REAL codecs seen as proprietary</li> </ul>	<ul style="list-style-type: none"> <li>• Existing Microsoft relationships with major telcos – Vodafone, Telefonica, BT, T-Mobile, NTT DoCoMo etc</li> <li>• PacketVideo</li> <li>• "Standards" e.g. MPEG4</li> </ul>

# Enterprise Segment Backup

## ① Product Assessment

### Real wins

- Rich-media authoring tools
- Unix client & server support
- Encoder push to server
- Remote server admin

### Real loses

- Desktop clutter
- Player as browser
- Server scalability

### Tie

- Managed player
- AV quality
- Bandwidth management
- Content management

## ② Alignment with Customer Requirements

Enterprise "fit"

Cost

Complete solutions

AV quality & Network impact

Enterprise	Analysts
<ul style="list-style-type: none"> <li>• Integration with existing systems</li> <li>• Cross-platform clients and servers</li> </ul>	<ul style="list-style-type: none"> <li>• Minimal integration but not a liability</li> <li>• Multi-platform client and server a big plus</li> </ul>
<ul style="list-style-type: none"> <li>• Enterprise licensing programs</li> <li>• Low price</li> </ul>	<ul style="list-style-type: none"> <li>• Real willing to drop price by 19% to win</li> <li>• Generally regarded as too expensive</li> </ul>
<ul style="list-style-type: none"> <li>• Software for authoring, publishing &amp; management</li> <li>• Prof Svcs for planning, deployment, encoding, hosting</li> </ul>	<ul style="list-style-type: none"> <li>• RCS a huge advantage, every deployment is custom</li> <li>• Complete solution hard to counter</li> </ul>
<ul style="list-style-type: none"> <li>• TV quality to the desktop</li> <li>• Bandwidth mgmt</li> </ul>	<ul style="list-style-type: none"> <li>• Parity situation, no advantage for Real</li> </ul>

## ③ Key Programs and Partners

### Programs

- SM starter kit
- Solution bundles on website (software, consulting, hosting)
- Free encoding from Loudeye
- Gov 1 seminar cases in VA

- Key programs visible through the sales force
- But not much impact on customers

### Partners

- Who's who of top ASPs on Internet
- Startlight and RCS inside the firewall
- Major UNIX vendors/OEMs (Sun, HP, IBM, Lotus, RedHat)
- Two Gov-specific resellers

- ASPs work with Real because "they have to"
- ABM strategy with UNIX vendors gives Real enterprise credibility

## ④ Worldwide Sales Force Structure

- Approx 50 enterprise salespeople worldwide
- 25 dedicated U.S. enterprise "segment" salespeople (lg accounts), represents 1% of U.S. sales force
  - Corporate 17 people
  - Government 5 people (all in DC)
  - Education 3 people
- 27 telesales, org'd by region, not vertical (6-7 ent. if ratio holds)
  - Very focused on OEMs (Sun, HP, IBM)
- 70 intl salespeople across 4 segments (15-20 enterprise if ratio holds)
- Compensation: Commission on units sold + bonus for new accounts

Gary Schare

SM Starter Kit

**CAPTURE IT** Osprey 100 video-capture card, Labtec stereo headset/boom microphone

**CREATE IT** Terran's Cleaner 5: RealSystem Edition—Limited-time addition. Software for batch-encoding and advanced filtering capabilities

**RealProducer Plus**—Content-encoding software

**BROADCAST IT** RealServer Plus—Supports 60 simultaneous (sic) viewers

**Upgrades and Support**—A full year for each of your RealNetworks products (worth nearly \$1,000). This entitles you to updates as we continue to improve these products and also means that you'll be able to reach a RealNetworks technical support engineer by telephone should you have a problem or question.

# Consumer Segment

## ① Revenue Summary

	Q4 2000	Q4 2001	Q4 2002	Q4 2003	Total
Partners (RealPlayer)	N/A	N/A	N/A	\$971	\$971
RealPlayer	\$7,798	\$9,612	\$11,800	\$13,700	\$42,910
RealJukebox	\$1,747	\$2,184	\$2,600	\$3,100	\$9,631
RealDownload	\$2,290	\$2,000	\$3,000	\$3,400	\$11,200
Other					
<b>Total</b>	<b>\$15,235</b>	<b>\$18,206</b>	<b>\$20,678</b>	<b>\$24,490</b>	<b>\$78,509</b>

### Growth Drivers

- Subscription services from installed base of RealPlayer/Jukebox users
- "Office" positioning for Real Entertainment Center (RealPlayer 8, RealJukebox 2, RealDownload 4)

## ③ Products, Programs, and Partners

### Products and Programs

- RealPlayer - streaming playback
- RealJukebox - local (CD, MP3, more) playback and creation
- RealDownload (download and zip file management)
- Real Entertainment Center (bundle of 3)
- GoldPass-\$9.95/mo consumer subscription program w/content and product upgrades
- Real.com - content showcase
- Real.com Online games - compatible with MSN Gaming zone

### Partners

- AOL for broadband
- OEM Phoenix distributing RealPlayer/Jukebox on "whitebox" oem machines

## ② Real Aligned with Consumer Requirements

	Real's Offer	Analysis
Ease of Use	<ul style="list-style-type: none"> <li>The right tool for your every need</li> <li>Cross-platform clients</li> </ul>	<ul style="list-style-type: none"> <li>Multiple UI maps confusing to consumers, reviews evidence this</li> </ul>
Best AV Quality	<ul style="list-style-type: none"> <li>TV quality to the desktop</li> <li>CD quality Audio</li> </ul>	<ul style="list-style-type: none"> <li>Parity</li> </ul>
Content Selection	<ul style="list-style-type: none"> <li>Widest range of content</li> <li>#1 player in the world</li> </ul>	<ul style="list-style-type: none"> <li>Still enough exclusive content to drive perception of leadership and customer need</li> </ul>
One-Stop-Shop	<ul style="list-style-type: none"> <li>Suite of consumer products + services</li> </ul>	<ul style="list-style-type: none"> <li>No all in one solution that is simple</li> </ul>

## ④ Real Consumer SWOT

<b>Strengths</b> <ul style="list-style-type: none"> <li>Leadership perception</li> <li>Highly competitive offering</li> <li>Services still new/unconquered in some markets</li> <li>Blending of player/content (including RealCenter GoldPass)</li> <li>Highly visible in PC market</li> </ul>	<b>Opportunities</b> <ul style="list-style-type: none"> <li>Subscription services back in vogue</li> <li>Continued assimilation of competing technologies - "universal client"</li> <li>Services continue to drive revenue, which feeds content, which feeds services</li> </ul>
<b>Weaknesses</b> <ul style="list-style-type: none"> <li>Customer life is cluttered and full of pop-up windows</li> <li>Upstart vendors create confusion</li> <li>Customer perception over player/Jukebox</li> <li>High AV requirements and branding requirements on devices</li> </ul>	<b>Threats</b> <ul style="list-style-type: none"> <li>MSN/Apple/Google as a competitor in the Real</li> <li>MS offers music services beyond content/purchase</li> <li>Consumer confusion drives customer away</li> </ul>

Kurt Buecheler

## Consumer Segment

### ⑤ Product Assessment

#### Real wins

- "Suite" of consumer products
- Consumer services offering w/Goldpass
- More "consumer UI" - complex, out looks good
- Mac support

#### Tie

- AN quality
- Distribution/installed base

#### Real loses

- Multiple UI confusion
- No fit in one player
- "Far-fee-Plus" version turns off NetGen customers

### ⑥ Consumer Marketing Structure

- RealNetworks Consumer business unit has two major divisions: Consumer Products (PC-based) and Consumer Appliances (non-PC based)
- ~30 marketing employees for RealJukebox, RealPlayer
- 5 for NetZip (RealDownload)
- The Consumer Appliance division's ~5 employees are focused on emerging Real product divisions (i.e., mobile device applications)

### ⑦ Goldpass Overview

- Introduced in August 2000
- Access to exclusive content, service programs, and product upgrades
- Only delivered ~\$400K revenue in first quarter 2000
- More details in Backup

### ⑧ Consumer Electronics

- **Partners.**
- Thomson/RCA (Lyra device - dropping Real format support in Q1 2001)
- Sony - format support/Jukebox bundling with future internet appliance but not Memory Stick or Vao devices
- Nokia (Agreement for "future" development)
- nCube (Broadband VOD)
- Real also on most internet radio devices today, but most are moving to parity with Windows Media

Kurt Buecheler

# ISP/Hoster Segment

## ① Revenue Summary

Revenue	2001	2002	2003	2004	2005	Total
Revenue	\$4,953	\$9,703	\$10,652	\$11,471	\$30,779	

### Growth Drivers

- Network SP growth rates 10%+ 15% Real revenue
- Network SP investing in large capital spend on IP networks globally
- Linux and Unix centric (+ NT) aligns with ISP and hosting incumbent infrastructures
- Real provides a one-stop implementation for hosting providers including consulting
- Cross platform / Cross format provides broadest reach

## ③ Key Programs and Partners

### Programs

- Three bundled Solution Programs
  - Professional Solution (100/200 80k & 16k)
  - Professional Webcast (400 / 80k + streams)
  - Professional Broadcast including live (100 / 80k, 200/812k & 400/822k)

### Partners

- Realnet - integrated media bundled with open source Linux
- AOL - branded player for AOL-Plus (BB)
- Nokia - Real player in EPOCH devices, promoting format for WAP
- @Home - 2 MM subs
- nCube - VOD solution integration w/Real8
- MC - RBN backbone provider
- IBM - level 4 partner

• Strong partner support in key technology areas and on incumbent platforms

Real is viewed as a technology and implementation partner, and competitor (RBN)

## ② Alignment with Customer Requirements

	Requirements	Analysis
Platform Agnostic	• Compatible with incumbent Linux & Unix (and NT) architectures	• Early penetration in preferred platforms in networks, momentum through upgrades
Pricing	• Per stream based pricing provides attractive entry pricing	• Multiple programs and pricing structures for entry and growth
Alignment with Content	• ISPs and Hosters want to offer their customers the leading formats	• 85% of the web media content is in Real format
Business Model	• Require sustainable revenue model	• Provide advertising extensions and PPV subscription models

## ④ Customer wins/losses

### Wins

- Real - EPOCH content and recovery in the WAP
- Deutsche Telekom RealSystem broadcast network
- Professional European satellite distribution network
- WebTV RealAudio

### Losses

- Real - offering of WAP model based on pricing and quality
- IP-Home

### Fighting - DRAM

- Adrenal
- Digital Islands
- Ewon

### Analysis

- Given functional parity, pricing is a determining factor for ISP/Hosting
- Early adopters and market share went to Real, but prices falling based on (per stream) price and content market share
- CDNASPs have a vested interest in multiple formats, drives multiple encoding, storage revenues

Kurt Buecheler

# ISP/Hoster Segment

## 5 Product Assessment

### Real wins

- Advertising insertion product
- Cross platform, Linux/Unix (NNT) support
- Local reports
- Stream splitting
- Scalability (perceived)

### Real loses

- DRM
- Per stream pricing
- Integration with general purpose OS services e-commerce, back office functionality

### Tie

- Business Model
- Support PPV/subscription
- Scalability (actual)

## 7 Worldwide Channel Structure

- Sell Direct through Segment Sales to Internet Infrastructure Providers (CDNs, ASPs, last mile providers)
- Indirect to media hosters and ISPs
- Outsource content onto RBN

## 6 Worldwide Sales Force Structure

- 35 dedicated Internet Infrastructure "segment" salespeople (AT&T MCI PSINet )
- 10 indirect sales people, ~ 2 assigned to ISP Media Hosting (part of RealPartner program)
- 3 Consumer Appliances Marketing people, non-PC based, includes mobile devices
- 27 telesales, org'd by region, not vertical (7-10 ISP if ratio holds)
- 70 mtl salespeople across 4 segments (20-25 ISP if ratio holds)
- Compensation: Salary + commission on units sold + bonus for new accounts (commission and bonus in stock or money)

## 8 SWOT

<b>Strengths</b> <ul style="list-style-type: none"> <li>• Platform Agnostic</li> <li>• Low startup costs</li> <li>• Significant experience in marketing</li> <li>• Significant client base</li> </ul>	<b>Opportunities</b> <ul style="list-style-type: none"> <li>• Complete integrated solution with back end services (e-commerce, back office, database, web publishing, mail, etc.)</li> <li>• ASP hosting (all applications) using protocols that allow WebTV, etc. to keep their ASPs, but integrate with a single meta-provider for flexibility</li> <li>• Network SP market faster margins than Enterprise managed services</li> </ul>
<b>Weaknesses</b> <ul style="list-style-type: none"> <li>• Narrow offering, broad customer requirements</li> <li>• Competition with CDNs and Hosters with ASPs</li> <li>• Competition with content aggregators with CDNs</li> </ul>	<b>Threats</b> <ul style="list-style-type: none"> <li>• None adopted Real partner for ERCC1 program Real to WAP content</li> </ul>

Real is viewed as a technology and implementation partner, and competitor (RBN)

Kurt Buecheler

# E-commerce Segment

## 1 Overview

For the purpose of this review, E-Commerce focuses on sites trying to sell merchandise on the web - retailers\* It does not include ICPs, digital media commerce, or advertising

### Growth Drivers

- Brand equity, player reach
- E-commerce solutions, ready to sell
- X-platform compatibility
- Dedicated e-commerce sales force and marketing team
- Integration with IBM, Sun, Linux e-commerce solutions
  - End-to-end solutions
  - Extended sales force

Real has a head start, and can own the space without focus from Microsoft sales force and partners

## 3 Programs and Partners

### Programs

- Real Professional Services e-commerce offering, centered around shopping travel and financial portals
- Celebrity Walks, using network of celebrities to drive site traffic

• Real Professional services handles most e-commerce deployments today

### Partners

- Few ASPs in e-commerce space, partnerships include Genuity, I-Structure.com, Xuma
- ABM in e-commerce space for end-to-end solutions (IBM, Oracle, Sun, Lotus)

• Lacking partner infrastructure to drive broad deployments

Real is viewed as the leader in E-commerce, due to player reach, solutions offering, x-platform compatibility

## 2 Alignment with Customer Requirements

	Requirements	Analysis
Player Reach	• Player already on the desktop of target audience	• Battle here is player usage. Real is winning
Solutions	• Solutions that make it easy to incorporate digital media in my Web site	• Real offers suite of scenario-based solutions that can be customized
Scalability	• Accommodate peak traffic without compromising user experience	• Real (on any OS) not as scalable as WM though not proven
Consumer experience	• Customer brand, embed the player • Multi datarate encoding • Audio/video quality	• Real loses on #1 parity at #2 and #3

## 4 Customer wins/losses

<b>Wins</b>
• World Market, REI, Google, Yahoo, Broadcast Networks, Real is Commercial Publisher, Guinness Book of World Records
<b>Losses</b>
• #2.com, Tech.com, Top 100 Sites
<b>Fighting</b>
• Microsoft, E-commerce, Rediff

### Analysis

- Default choice is Real
- WM sometimes at parity rarely WM-only
- Real loses when we engage

Kurt Buecheler

# E-commerce Segment

## ⑤ Product Assessment

### Real wins

- Solutions not just technology platform
- X-platform support
- Encoder push to server
- Remote server admin

### Real losses

- Branding
- Customizable player
- Server scalability
- Consumer privacy

### Tie

- Multi-datarate encoding
- AVI quality
- Bandwidth management
- Content management
- Secure transactions

### Product/Solutions Offering

- RealSystem, RealServer touted as e-commerce platform
- TV Commercial Hosting
- Multimedia Merchandiser
- Talking Catalogs
- Travel Portal
- Internet Radio Station
- Integration w/ ISM eServer (AIX)

## ⑥ Worldwide Sales Force Structure

- 16 total sales heads in e-commerce
  - 10 in Segment Sales (top accounts)
  - 8 in Direct Sales (smaller accounts)
- 5 total marketing heads in e-commerce

## ⑧ SWOT

<b>Strengths</b> <ul style="list-style-type: none"> <li>• Perceived as "leading edge" company in digital media space</li> <li>• Basic reality Player reach</li> <li>• Complete solution offering</li> <li>• X-platform compatibility</li> <li>• Professional services</li> </ul>	<b>Opportunities</b> <ul style="list-style-type: none"> <li>• Top 1000 shops as leverage point</li> <li>• Role similar to IBM, Sun or in e-commerce penetration</li> <li>• Participation VC/PE in new business development</li> <li>• Work through MCSPs to get into Microsoft Associate</li> </ul>
<b>Weaknesses</b> <ul style="list-style-type: none"> <li>• Services and tools in the deployment of Real solution to the market focused on small # of big deals</li> <li>• Expense product solutions compared to competition</li> <li>• Scalability not proven</li> <li>• Customer satisfaction</li> <li>• Customer relationships are weak</li> <li>• Question about Peak's longevity</li> </ul>	<b>Threats</b> <ul style="list-style-type: none"> <li>• Customer switch to other content providers</li> <li>• MS has e-commerce sales force to pick up opportunities we can't manage</li> <li>• MS's success in response puts MS in e-commerce</li> <li>• MS has other MCSPs</li> <li>• WM Player reach continues to catch up</li> </ul>

### Analysis

- There is a lot of opportunity "left on the table" where neither Real nor WM is engaged
- Real is default choice based on brand equity/player reach
- As WM Player reach grows customers will be unwilling to pay Real
- MS shops will default to WM because "it's there"

## Advertiser Customer Segment

### ① Revenue Summary

Real Networks- Revenue from Advertising

Q4 1999	Q1 2000	Q2 2000	Q3 2000
\$ 6 685	\$ 8 407	\$11 797	\$13 506

\*Metrics in thousands

Expect our advertising revenues to drop significantly in the next few quarters. The market for internet advertising has somewhat soured and a few of our major contracts are expiring in the 4<sup>th</sup> quarter of 2000. We need to compensate for the loss in other areas. Director, Public Relations, Real Networks

### ② Ad Revenue Growth Rate

#### Analysis

- Real's sales strategy involves cross-selling software, services and advertising to each customer. These package deals account for up to 30% of total sales.
- Real is geared toward leveraging its player distribution, site traffic and guide real estate to maximize its revenue - Real charges most ICPs - gives free promotion only to top content partners.
- Real's partners on the player channel bar pay a fee for the premium brand placement.
- Expansion in international markets. Real will attempt to mimic its' first-mover success in the North American markets in emerging markets, other than Europe and Asia.

"In order for us to sustain our market lead, we must concentrate our efforts in areas that we see opportunity. Since the consumer, ICP and advertising markets are on the decline, we need to focus on Enterprise, and professional services. Of course we cannot exclude our international efforts which should help us drive our growth rate. (VP, Marketing, Real Networks' International Group)

### ③ Key Programs

#### Programs

- Advertising (Real.com & Real Guide)
- Storing Fees
- Revenue Skimming: Real avoids revenue sharing derived from commerce, instead requiring upfront fees.
- Database Sales: Real utilizes its user registration DB for targeted partner promotions that start at \$25K.

#### Web & Distribution Sales

- Website Advertising Sales
- Media and Distributions Sales

- Audio Highway paid \$100K per month for NetZip Placement
- Checkout.com paid \$10M upfront for broad placement on Real Guide
- Real's 15 person advertising Sales team is responsible for traditional website advertising in addition to media and distributions sales.

Kurt Buecheler

## Advertiser Customer Segment

### ④ SWOT

<b>Strengths</b> <ul style="list-style-type: none"> <li>• 100M+ installed base and resulting impressions in play and traffic</li> <li>• Proven sales capabilities</li> <li>• Track record of ICPs buying</li> <li>• Strength in consumer segment</li> <li>• Cross selling of software, services and placement</li> </ul>	<b>Opportunities</b> <ul style="list-style-type: none"> <li>• Picking up ICPs who cannot afford Real's spots</li> <li>• ICPs are getting a steady flow of WMP 300 users</li> <li>• Windows Media integrated more deeply into MS 7</li> </ul>
<b>Weaknesses</b> <ul style="list-style-type: none"> <li>• Cold pass introduced Aug 2000 not as successful as expected</li> <li>• Limited in other ad markets</li> <li>• MSFT is delivering better value to ICPs and consumers</li> <li>• Key contracts expiring in Q4</li> </ul>	<b>Threats</b> <ul style="list-style-type: none"> <li>• Microsoft's expansion into additional sites/people</li> <li>• Potential cancellation of Real's coverage not paying in paying customers generated \$3.91K in the third quarter of 2000</li> </ul>

### ⑤ Geographic Revenue Breakdown (For all revenue, Geo. details for ad revenue not available)

	Q4 1999	Q1 2000	Q2 2000	Q3 2000	Total Q4 1999 - Q3 2000
North America*	\$34,328	\$41,172	\$48,989	\$48,391	\$172,880
International	\$9,126	\$12,366	\$16,667	\$18,733	\$56,892
TOTAL REVENUE	\$43,454	\$53,538	\$65,656	\$67,124	\$229,772

Kurt Buecheler

## Enterprise -- Keeping Up the Momentum

### Microsoft WW field

- ▶ Target accounts aligned with Win2000/SunDown goals
- ▶ Drive integration w/ MS vertical sales teams
- ▶ Increase TS/MCS Champs accountability via goal-oriented Champs program
- ▶ Deliver training to Champs via WM Airlift
- ▶ Deliver WM Sales/Training Kit to WW field
- ▶ Participate in relevant district events
- ▶ Equip target offices with encoding "studio"

### Windows Media ASPs

- ◆ Strategically invest in top 1-2 ASPs, to drive broad adoption of WM
- ◆ Deliver WM Sales/Training Kit to masses
- ◆ Handpick ASPs to participate in WM RDPs
- ◆ Co-fund advertising, customer events

### OEMs

- ◆ Partner with top OEMs in enterprise space, include WM material "in the box"

### Microsoft Certified Partners

- ◆ Identify MCPs to be WM "Champs"
- ◆ Deliver training to MCP Champs, in conjunction with WM Airlift for TS/MCS
- ◆ Deliver WM Sales/Training Kit to masses
- ◆ Integrate WM content in MCP events and materials
- ◆ Showcase top 5 MCPs making most \$\$ with WM, share best practices

### Customers

- ◆ Re-ignite Customer Advisory Council
- ◆ Implement RDPs for Producer/Eclipse
- ◆ Deliver Webcasts targeting BDMs
- ◆ Integrate in TechNet efforts to reach IT
- ◆ Integrate in relevant broad reach advertising driven out of CMO
- ◆ Build inventory of customer references, case studies, showcase on the web and at events

Gary Schare

## Market Conditions

- ① **PC/Internet Growth Continues Globally<sup>1,2</sup>**
- US no longer leader in home PC penetration, but still largest PC/Internet user population
  - Heavy growth in Europe and Asia, both PC and Internet

PC/Internet Penetration	1999 HH PC Pen	Growth 1999-00	HH Internet Pen	Growth 1999-00	Est. # Internet Users (Million)
Australia	61%	8%	34%	48%	6.8
US	51%	1%	39%	66%	11.87
Japan	50%	2%	28%	16%	14

Eastern Europe	18%	6%	8%	10%	8.0
SouthEast Asia	13%	2%	7%	25%	9.5

- ② **Digital media stimulating adoption of new internet activities, trial of new technology/ devices<sup>3</sup>**

- In US PC becoming popular device for music/video
- 42 Million played music CDs on PC in past month
  - 24 Million downloaded music to their PC
  - 20 Million listened to streaming audio
  - 19 Million listened to Internet radio
  - 14 Million watched streaming video
  - 6 Million burned their own CDs

- ③ **RealPlayer Winning Share War Globally<sup>4,5</sup>**
- RealPlayer leads in consumer usage in 8 out of 9 key Internet-using countries
- Adoption highly driven by brand awareness and Real's dominant share of content, product not differentiated as "better player"<sup>6</sup>

Media Player Usage	Any	Real	WMP	Est. # Real Customers (Million)

## The AOL-RealNetworks Relationship Evolution

- ▶ **Distribution Deals**
  - ▶ Real Ships with AOL Signup Software
  - ▶ Real Player ships with Netscape browser and Netcenter
- ▶ **Integration**
  - ▶ Real Player is part of AOL's Spinner Player
  - ▶ Real integrates AOL Instant Messenger
  - ▶ AOL integrates Real Player into Netscape
- ▶ **Content**
  - ▶ AOL sponsors and obtains internet rights for BigBrother TV Show AOL Selects Real as exclusive technology provider Real paid \$3 - 5M for privilege
  - ▶ AOL drives its ICPS to provide content in Real formats
- ▶ **Future deals**
  - ▶ AOL/TW merger documents discuss potential acquisition of Real Networks
  - ▶ January - Thought of acquiring them by Summer - Still thinking about but no immediate plans
- ▶ **Industry**
  - ▶ Yahoo stated belief that AOL will buy Real
  - ▶ Yahoo has moved away from Real and has towards integrating WMT

AOL Bundles Player on AOL CD - first player bundled (AOL V.4.0) (RN 5.0, 02)	RealPlayer launches AOL AIM Q2 Update 1	AOL selects Real for AOL Plus (BB) service RealPlayer, RealProducer, and RealServer	Real creates AOL-branded Player	AOL selects RealSystem II network-wide deployment	Content partnership around BigBrother TV program	Netscape 6.0.2 ships Real Player browser and Netcenter	Real distributes Spinner AOL's free Web radio player based on RealPlayer technology	Real bundles AOL signup software with Real Player	AOL ships Netscape 6 with RealPlayer 8

# AOL Integration Examples

The image displays three examples of AOL audio player integrations:

- AOL featured content player:** A screenshot showing a 'real' logo and a video player interface with a 'Play' button. A callout box points to it with the text 'AOL featured content player'.
- AOL Video player:** A screenshot showing a 'real' logo and a video player interface with a 'Play' button. A callout box points to it with the text 'AOL Video player'.
- AOL Audio Player – uses video space for brand/ads:** A screenshot showing a video player interface with a 'Play' button. A callout box points to it with the text 'AOL Audio Player – uses video space for brand/ads'. A separate callout box above it says 'Note that RBN delivers AOL audio channels'.

## Cash Flow and Profitability Summary

### 9 QUARTERS OF POSITIVE CASH FLOW AND 4 QUARTERS OF PROFITABILITY

(\$ in millions)	1996	1997	1998	1999	2000E	CAGR
Revenues (1)						
Licensing	\$19.4	\$29.2	\$48.5	\$90.6	\$154.8	88%
Service	1.1	5.0	14.7	28.5	55.2	165%
Advertising	1.0	2.3	3.1	14.1	47.4	161%
Total	\$21.6	\$36.4	\$66.4	\$131.2	\$257.4	88%
Growth	290%	69%	82%	98%	96%	
Op. Income	(\$4.4)	(\$17.0)	(\$13.8)	\$0.5	\$25.3	
Net income	(4.1)	(14.8)	(9.8)	12.0	36.3

## International Spend Grows

Majority of revenues derived from N. America, however, int'l revenues now comprise 28% of total, with significant growth during '99 from Europe

40% of RealPlayer users are international (approx. 50mm)

14% of RNWK's employees are based overseas, with growth slightly higher than Seattle-based S&M employee growth

(1) Assumes all employees based in international offices are in the Sales & Marketing function.

Kurt Buecheler

## Financials – Income Statement

(\$ in millions)						
Revenues (1)	1996	1997	1998	1999	2000E	1999-2000 Gr
Licensing	\$19.4	\$29.2	\$48.5	\$80.8	\$154.8	68%
Service	1.1	5.0	14.7	26.5	55.2	166%
Advertising	1.0	2.3	3.1	14.1	47.4	161%
Total	\$21.6	\$36.4	\$66.4	\$131.2	\$257.4	88%
Growth	293%	69%	12%	98%	90%	

(\$ in millions)						
	1996	1997	1998	1999	2000E	1999-2000 Gr
Gross Profit	\$16.5	\$25.4	\$40.2	\$77.6	\$137.5	70%
Licensing	80%	87%	83%	86%	89%	
Service	\$0.6	\$2.6	\$12.1	\$19.9	\$40.8	191%
Margin	51%	52%	82%	75%	74%	
Advertising	\$0.7	\$1.3	\$1.4	\$11.2	\$38.4	170%
Margin	72%	58%	45%	79%	81%	
Total Gross Profit	\$17.8	\$29.3	\$53.7	\$108.8	\$216.7	87%
Margin	83%	80%	81%	83%	84%	
Operating expenses						
R&D	\$6.3	\$15.7	\$22.5	\$38.4	\$68.1	74%
As % of Sales	29%	43%	34%	29%	23%	
S&M	\$10.2	\$23.0	\$33.5	\$63.6	\$103.1	75%
As % of Sales	47%	63%	50%	41%	40%	
G&A	\$5.8	\$7.6	\$11.5	\$16.4	\$30.1	51%
As % of Sales	27%	21%	17%	12%	12%	
Operating Income	(\$4.4)	(\$17.0)	(\$13.8)	\$0.5	\$25.3	
Other Income	\$0.3	\$2.2	\$4.9	\$11.5	\$19.0	
Pre-tax Income	(\$4.1)	(\$14.8)	(\$8.8)	\$12.0	\$44.3	

Significant growth over recent years from Services, but 1999 and 2000E Advertising growth is stellar

Gross margins have been highest in Licensing, but growth is coming from Service and Advertising

R&D spending (% of sales) has been falling in comparison to historical levels

Sales & Marketing spending forecasted to nearly double in 2000

Steady-state operating margins forecasted to be 30% (given current business mix), up from current 8%

Denmark West

## Financials – Geography

(dollars in millions)

Revenues by Geography	1996	1997	1998	1999	% Total	CAGR	'99-00 Gr.
North America	\$18.9	\$24.0	\$44.1	\$53.3	71%	70%	111%

Bear Stearns	7/18	Attractive	

### Analyst Comments:

Competitive landscape is severe ... [but] MSFT's focus on own format and operating system will allow RNWK to leverage more compatible offerings and maintain market position

RNWK has lots of leverage in its revenue model

Multi-year deal with AOL for Real's client and server software meaningfully alleviates our longer-term competitive concerns vis-à-vis Microsoft

RNWK does not burn cash [as do most Internet companies] but rather generates cash

Success of RNWK portal could be limited by competition from Yahoo! Broadcast, more established Web presence

Broadband access may not take off as quickly ... demand for RNWK products may not accelerate in the near term

RBN will find it difficult to compete with Akamai's larger network and support for multiple streaming formats

Shifting focus away from software to content

DELETE AFTER KURT INTEGRATES

**Big Brother (Fall 2000)**

- ▶ Purchase content on exclusive terms from Endemol (Terra)
- ▶ Pay for all encoding, bandwidth and production
  - ▶ Total cost \$1.2m
- ▶ Outcome
  - ▶ Massive media coverage
  - ▶ Great pitch for ICPs- "we did big brother!"
  - ▶ Covered 9% of online market for over 2 weeks in UK, DE, ES
- ▶ Only \$360K collected in player revenue/upgrades
- ▶ Ad revenue went to Endemol
  - ▶ Turned \$36M in profit largely due to BB event/ related online efforts

EMEA

- ▶ Deutsche Telecom 7.5M
- ▶ British Petroleum 2M
- ▶ Cable and Wireless 650K

Japan

- ▶ Transcosmos -1.6M
- ▶ Softbank-1.1M

Asia

- ▶ Tom.com 240K

# PR: Press and Analyst Audit for CY2000

## 1 Overall Corporate Messages

- RealNetworks is making the Internet a new mass medium for audio and video
- RealNetworks is the recognized pioneer and leader in providing consumers with the best media experience on the Internet
- RealNetworks is accelerating the adoption of Internet media and the viable business models to support it
- Additional messages revolve around Rob Glaser as industry pioneer, Real as a media company, Real as a technology enabler, Real as a consumer sw developer

## 2 News Summary

Focus Area	Press Releases Issued			Coverage By Media	
	Real	3rd Party	Coverage	Media Type	# Stories
Real as corporation	23	0	47	Business Press	52
Real's media efforts	19	63	85	Tech Trades	129
Real as tech enabler	39	38	79	Consumer Press	4
Real as consumer sw developer	24	17	46	Music/Ent Press	20
				Enterprise/IT Press	2
<b>Total</b>	<b>105</b>	<b>108</b>	<b>237</b>	<b>Total</b>	<b>237</b>

## 3 Reviews Summary

RealNetworks Player		Windows Media Player 7	
Win	6	Win	15
Tie	3	Tie	8
Loss	5	Loss	4
No score	1	No score	5
% Win/Tie	64%	% Win/Tie	84%
Avg. Rating	3.107	Avg. Rating	3.14

RealNetworks Real System		Windows Media Technology	
Win	3	Win	8
Tie	5	Tie	4
Loss	3	Loss	2
No score	1	No score	1
% Win/Tie	73%	% Win/Tie	88%
Avg. Rating	3.04	Avg. Rating	3.006

The Avg. Rating refers to the extent to which Real's messaging was included in the review. Avg. Rating ranges from 2.5 - 4.0 (2.5 = no messaging or mentioned negatively, 3.0 = no messaging / neutral tone, 3.5 = correct messaging, 4.0 = all messaging / positive tone)

## 4 Analyst Relations Summary

Analyst	Firm	Real's Rating	Real's Trend	Win %
Richard O'Leary	Emulsionering	4.0	even	2.5
Larry Gerbrandt	Paul Kagan	3.5	slightly down	2.5
Seamus McAlear	Jupiter	3.0	even	2.5
Malcolm Macjichian	IDC	3.0	up	3.0
Billy Pidgeon	Jupiter	3.0	even	3.0
Stacey Quandt	Giga	2.6	even	3.5
Eric Sherris	Forrester	3.0	even	3.0
Arin Shiroch	Jupiter	3.0	down	3.0
Steve Vander Haar	Yankee	3.0	even	3.0

### Ratings Legend

- 2.5 - Negative: Does not understand company, tech strategy, regularly provides negative quotes and/or trends, is "hard" on the competition
- 3.0 - Neutral: Does not offer quotes that affect positioning, is "ho-hum" either way
- 3.5 - Favorable: Tends to offer positive quotes
- 4.0 - Highly Favorable: Clearly understands company tech strategy, regularly offers positive quotes, "slightly" down on the competition

## Digital media growth in consumer space

### ► Increased participation in many digital media activities

- » *One in three internet users download music*
- » *One in four listen to internet radio and other streaming audio*

\*Done by member of HH in past month

Source: Digital Media Consumer Tracker Q400

Gary Schare

## Digital media player awareness

► **In the consumer space, Real is the most familiar brand of digital media player**

- *Real's awareness has grown from 39% to 56% in the past year*
- *WMP only brand to grow at a higher rate during this period*

Source: Digital Media Consumer Tracker Q100

Gary Schare

## Digital media brand perceptions

▶ Even with Real's strong position in awareness and use, DM brands really aren't differentiated in the consumer space

▶ MP3 perceived as leader, best content selection, best sound

▶ WM and Real close/at parity on most attributes

## Streaming Technology in LORGs

▶ **Adoption of streaming technology (any brand) nears 20% among LORGs**

- ▶ Streaming technology used on both Internet and InTRAnet
- ▶ Opportunity among both current users and non-users

Adoption of Streaming Technology

Share Among Streaming LORGs

Among those companies using streaming technology today, WMT share exceeds Real

- ▶ Total share for Real 41% compared to 68% for WMT

Source: LORG Digital Media Tracker, 10/00

Gary Schare

**Catherine Ward**

## Global Handset Segment Share

Company	% share of market	Number of handsets sold (millions)
Nokia	27.2	26.95
Motorola	15.4	15.2
Ericsson	10.2	10.1
Panasonic	5.6	5.5
Alcatel	5.5	5.47
Siemens	5.5	5.42
NEC	5.5	5.41
Others	25.1	24.9
TOTAL		99.95

### Regional variations

There are significant regional variations in market share, including

**Germany** – Nokia 35%, Siemens 35%, others in single digit %s

**Japan** – dominated by Japanese manufacturers, Matsushita (Panasonic), NEC, Sharp, Toshiba, Kyocera etc. Nokia, Ericsson have virtually no presence, but are beginning to target the market by developing I-mode handsets for NTT DoCoMo

**Korea** – dominated by Korean manufacturers, Samsung, LG, Hyundai. Again Nokia has virtually no market share

0	0	1	1	1	13	0	4

### Summaries of Noteworthy Cases:

- RealNetworks vs. Streambox - In December 1999, Real filed suit against Streambox alleging Digital Millennium Copyright Act violations based on three Streambox products that circumvented Real's copy protections for its formats. Streambox countered that Real was attempting to monopolize streaming media. The federal court in WA prohibited Streambox's sale of VCR and Ferret products, but found that Ripper (which converted Real's formats to other formats) could have uses that didn't violate the Act. The case was dismissed in September 2000.

- RealNetworks Privacy Litigation - Eleven consumer class actions alleging that Real illicitly collected information about users without their knowledge or consent. In May 2000, Court stayed the litigation upholding the EULA requirements that parties resolve such disputes before an arbitrator.

# RealPartner Program - Partner Requirements

## RealPartner Program Recent Notable Items:

- Added a searchable online partner database
- Now charge for all but the most basic level of membership
- Added membership requirements of two reference sites
- Improved web presence - well organized information
- Third party banner ads on partner pages
- Partner application now mirrors WMSP

## Training

### Training Classes

- Two Courses
  - RealSystem Content Creator (3 days, \$1495)
  - RealSystem Administration (2 days, \$1095)
- Online Registration
- Classes held in Seattle at Real's Offices
- Hands on / Instructor led
- Max 20 students per class
- Pentium III workstations

**RealNetworks University of Streaming Arts**  
As the leading provider of streaming solutions, we provide you with the most powerful solutions to help you build your knowledge and create a successful streaming media business. You'll receive a comprehensive business plan and a detailed guide to help you succeed in the streaming media market.

**Classes currently available:**

- RealSystem Content Creator
- RealSystem Administration

**Our training prerequisites:**

- A computer with Windows 95/98/NT
- 64MB of RAM (minimum 128MB recommended)
- Hard disk space (minimum 1GB recommended)

**State of the Art training facilities**  
RealNetworks USA offers a state-of-the-art training facility. Our classrooms are equipped with the latest technology, including 100% hands-on training, and are staffed by Real's best and brightest instructors. Our state-of-the-art training facilities are located in Seattle, WA.

### RealSystem Content Creator Syllabus

This course is for audio and video production professionals, new media creatives, as well as content authors. We'll explore and format content creation. You'll learn about content creation and content authoring issues surrounding streaming media, and gain a solid understanding of RealNetworks streaming technology.

### Skills You'll Acquire

- Understand RealSystem architecture
- Knowledge of required and optional hardware components for media production
- Accurate course content
- Encoding of audio and video content
- Use RealProducer Plus, RealPlayerPlus, RealStudio, RealPlayer
- Archive RealMedia
- Publish RealMedia
- Embed a RealPlayer plug-in from HTML
- Create a RealPlayer skin
- Implement RealPlayer in a website
- Administer RealPlayer skins and skins files
- Present a strategically planned RealPlayer presentation

### RealNetworks RealSystem Administration Syllabus

This course is for IT professionals, Webmasters and networking consultants. You'll gain a thorough knowledge of RealServer administration and the qualifications to deploy and maintain a standard streaming media server.

### Upon completion of each course, students will be able to:

- Understand RealSystem architecture
- Install RealServer
- Monitor RealServer activity
- Configure RealServer options
- Detect and correct server issues
- Detect live Webcasts
- Read RealServer Activity Reports
- Enable multicasting for Webcasts
- Set up splitting servers for live video streams
- Authenticate RealServer visitors

## Cost of Streaming Ads

Ad Revenues May Not Cover Costs to Deliver Streaming Content

Streaming Content Delivered	Type	Length (Seconds)	Speed (KBPS)	Size (MB)	Cost Per MB**	Cost Per 1,000 Users
VHS-quality video	3 min. + 20 second ad	200	0.300	7.5	\$0.01	\$75.00
Low-quality video	3 min + 20 second ad	200	0.100	2.5	\$0.01	\$25.00
Internet radio - CD quality	2.5 songs + 20 second ad	470	0.080	4.7	\$0.01	\$47.00
Internet radio - FM quality	2.5 songs + 20 second ad	470	0.024	1.4	\$0.01	\$14.10

\*There are 8 bits per byte. Therefore 300 kilobits per second equals 37.5 kilobytes per second. \*\*Average cost to content providers to deliver a megabyte of data. Source: The Standard

Kurt Buecheler

## RN/MS CURRENT PRODUCT Comparison

### ▶ Where MS wins

- ▶▶ **Audio Codec Quality**
  - *WMA is hands down win across all bitrates*
- ▶▶ **DRM**
  - *RN's third party add-ons less than impressive*
- ▶▶ **Screen Capture**
  - *Codec and screen capture app*
- ▶▶ **All-in-one Media Player**
  - *RN requires three apps*
- ▶▶ **Browser integration**
  - *More powerful embedded control. Scripted events can be more powerful than SMIL*
- ▶▶ **Server Scalability and reliability**
- ▶▶ **Playlist support**

### ▶ Where we tie

- ▶▶ **Video Codec Quality**
  - *They may have slight advantage at low bitrates only*
- ▶▶ **Authentication and Authorization models**
- ▶▶ **Skins, visualizations, media management**

### ▶ Where RN wins

- ▶▶ **Synchronized media**
  - *They are seen as 'owning' SMIL*
- ▶▶ **Multi-platform**
  - *Mac Player Linux server*
- ▶▶ **Ease of use**
  - *Server and encoder*
- ▶▶ **Server administration, monitoring, logging**
- ▶▶ **Integration of third party apps and plug-ins**
- ▶▶ **Standards Based Networking**
  - *RTSP, RTP*
- ▶▶ **Push distribution**

**Product features are important  
... but currently the major battle  
is in marketing and bus dev.**

Demonstration Slides

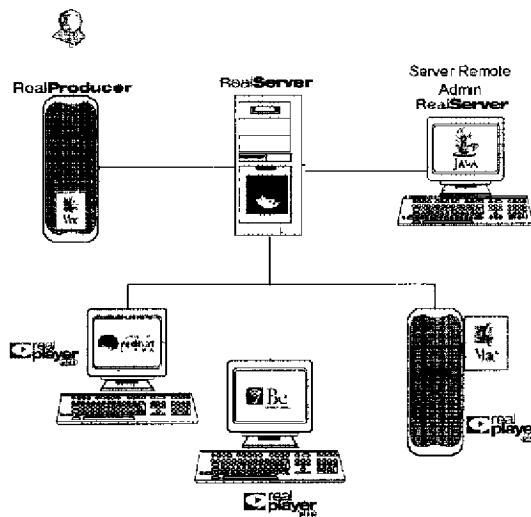

# DEMONSTRATIONS

David Caulton

## The Real Platform – Complete Webcasting Server Solution

Demo – realserver admin, linux player

- ▶ A mac with a firewire camera is doing a live broadcast.
- ▶ Distributed by a Linux server.
- ▶ The server administration client is built from html and Java.
- ▶ Very powerful, rich clients on all platforms
- ▶ ...Real everywhere, Windows nowhere.

David Caulton

This centers around the webcasting lan over in the corner of the room

You care because this demonstrates that cross-platform media isn't vaporware – Real makes it not only possible, but optimal.

Key points:

1. You don't need windows for any aspect of the media world
2. There is no degradation in product quality in these scenarios
3. Clients are strongest on all platforms .very rich media content (Flash, SMIL, etc . ) look the same everywhere.
4. Note that both live and on-demand are here
5. Note that QuickTime is streamed from the Real server to QuickTime clients.
6. Note Java administration client

### ***Benefits of this cross-platform strategy***

▶ **Server** – Servers on all platforms

- ▶ *Ride the unix bandwagon*
- ▶ *increase cost of switching (e.g., going from real - msft is easier on windows than linux)*
- ▶ *Enable Sun and Linux dedicated shops*

▶ **Client** – Rich, interactive media in the player, everywhere

- ▶ *They have created the most attractive broadcasting and advertising platform.*
- ▶ *Reach all possible users (win, mac, unix)*
- ▶ *You really can write once on the most popular formats (Flash, Real), run everywhere - apparently with little testing.*
- ▶ *Positions them for new embedded devices (e.g., Netpliance iOpener)*

Microsoft Confidential - Internal Use Only

## How the consumer gets "Real"ed

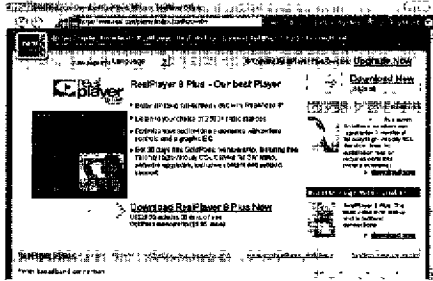

- ▶ it's on my computer
  - ▶ Comes with AOL, AT&T @ home
  - ▶ Sony, Gateway, etc ..
  - ▶ Aggressive bundling with devices.
- ▶ "I need it for cool content"
  - ▶ A happy MSN/Mars user goes to [abcnews.com](http://abcnews.com)...wants to watch a video – Must get Realplayer. Click "get" link...enter Real Land

### video

Will Florida's Supreme Court decide who is the next President?

[RealVideo](#)  
(download RealPlayer)

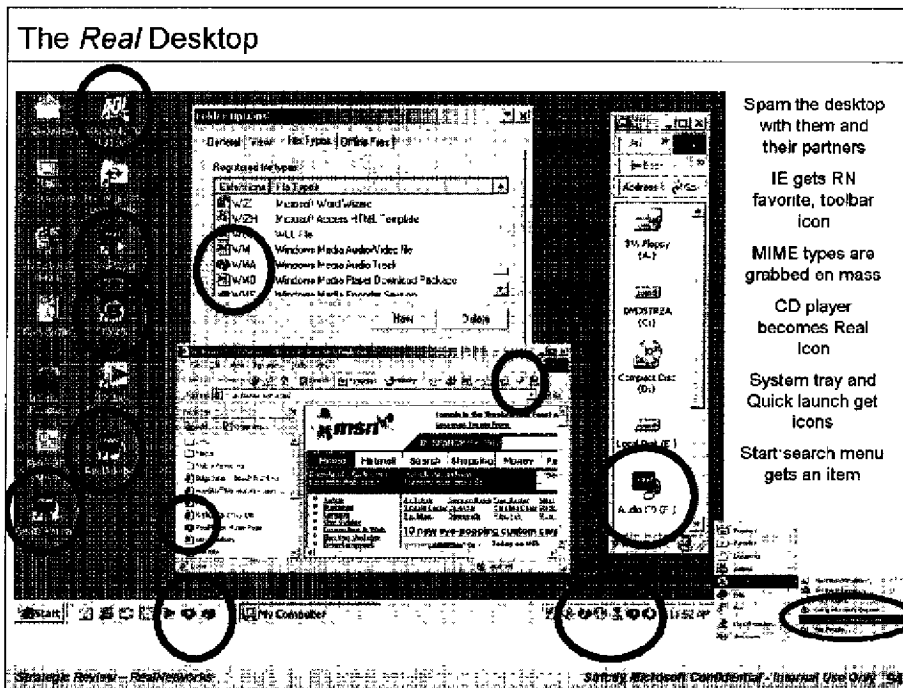

Demo – download and install RealPlayer

David Caulton

You care because it explains how and why users get sucked into Real

1. Most users don't get Real because they want Realplayer. .
2. They get it with some other software or service they want
3. Or adoption is driven by content
4. Once you click to download RealPlayer, you get driven relentlessly to download the paid version
5. You also get a bunch more than you bargained for...all download's include other products and services

David Caulton

You care because...well, just look what they do to Windows!

1. Note AOL link on desktop
2. Note all the links to products and services on desktop
3. Note quick launch, system tray icons
4. Note MIME types grabbed
5. Note new start/search "media search engine"
6. Nearly all of these lead you to a Real product or service that generates revenue.

**Summary - RealPlayer Download Process**

**User starts out just wanting Realplayer, but ends up:**

- Getting relentless upsell to the \$30 player, and more...
- seeing revenue-generating advertisements
- Installing extra software
- And they grab the user experience - **This user will never be more than a couple clicks from Real again**

Demo here is that the user goes to abcnews.com, wants some content.  
Must dl realplayer

Show that the dl process ends up installing much more than the player...

Next slide will act as a guide to how thoroughly Real has nabbed the user's windows.

## Demo - What Real Grabs, and the effect on Windows

- ▶ SMIL
- ▶ RTSP
- ▶ SSM
- ▶ Mpeg
- ▶ Mp3, mp3 playlists
- ▶ Wav
- ▶ CD
- ▶ .au
- ▶ AIFF
- ▶ Avi
- ▶ .wma

...Pretty much every media type

- ▶ They grab, and if anything gets grabbed back, they nag or just autograb back

- ▶ As a result, Real owns substantial Windows Interaction.

Demo – Real owns the media experience

Won't list all the media types, just say they grab everything.

Two demos here:

inserting a CD, up pops RJB

doubleclick on a media file, get Realplayer

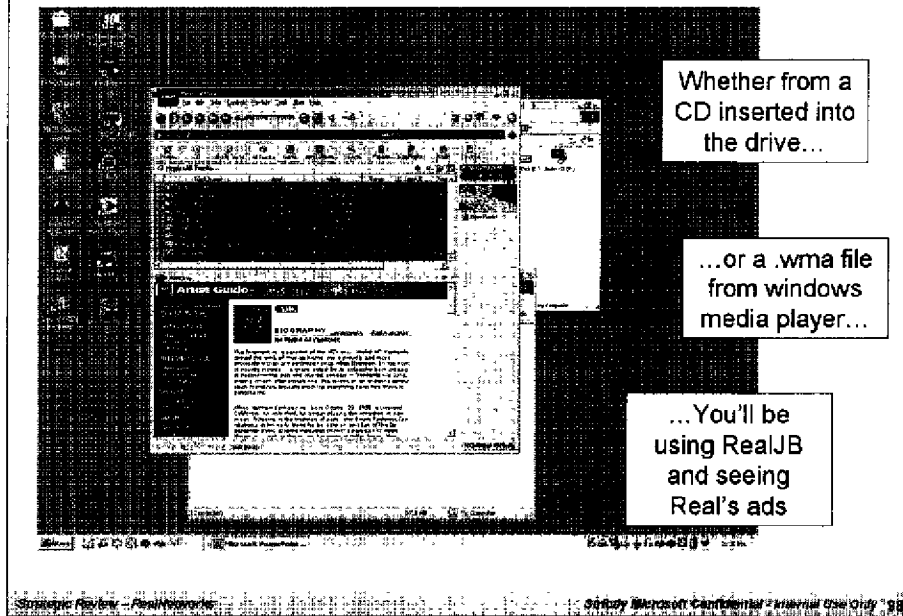

Go to a web page from mars, click on a real link from ABCnew.com

▶ **Demos**

- ▶ *playing a CD*
- ▶ *Playing an mp3*
- ▶ *Getting MSN explorer*

## Demo - Real owns the windows users' Media experience

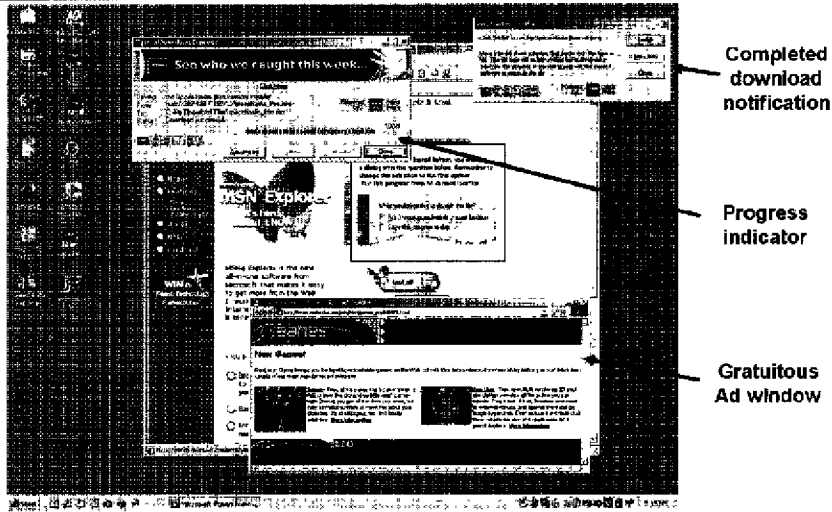

David Caulton

Why do you care? This demo shows how you end up in RealJukebox seeing Real ads whenever you try to do anything with media

1. Whether it's from inserting a CD
2. Or from clicking on a WMA file
3. Note the artist guide links to Ecommerce partner

...And Real gets a substantial hunk of the internet experience.

.Simple Windows task has become a blinking ad for RealNetworks.

David Caulton

Demo slide...how RealDownload works.

## RealDownload

*Real is very aggressive about getting RealDownload onto Desktops*

### What is RealDownload?

#### For users:

- ▶ Hard to get far with RealNetworks without encountering this freebie – w/ free player, most of their game downloads, etc...
- ▶ Friendly downloads – ads resume, autoinstall, fixes windows download dialog, caches downloads

#### For Real

- ▶ Provides adware real-estate
- ▶ Tracks user downloads, reports back to Real

*Capitalize on this unique sponsorship to interact with one of the most sought after internet audiences – the elusive "captive, passive" audience.*

– RN advertizing brochure

David Caulton

Why do you care? Realdownload is important to Real as a revenue vehicle, and abusive of Windows

1. Users get it because it comes with other stuff
2. But it does ad value – friendly downloads
3. Real gets ad revenue...
4. ...and to track lots about user behavior.
5. Many users hate this, but it's tough to get rid of...

On the privacy topic...

**Realnetworks seriously and consistently violates the privacy of their customers.**

- ▶ **RealDownload** threatens enterprise security. Sends complete internal address of files on enterprise intranet in the clear.
- ▶ **RJB** has been caught sending private consumer information to RN
- ▶ **Real** has not fixed most of these problems, and has never revealed what they do with all of this very detailed customer information.

**RN has never been held accountable for these violations**

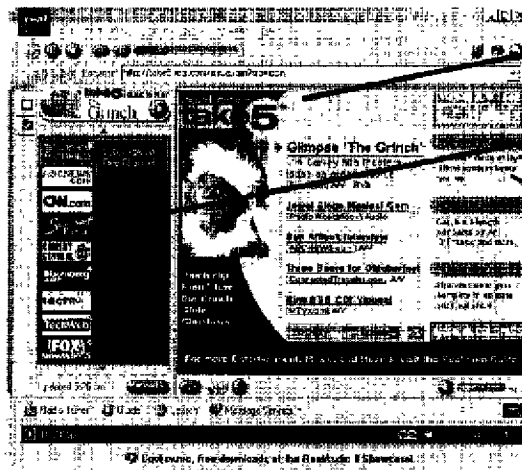

Why do you care? Real is consistently violating privacy norms.

1. RealDownload threatens enterprise, user security
2. Real Jukebox helps Real utterly profile your media behavior
3. Real ignores these problems and objections.

## Real – the Portal

**Don't need MSN or IE for that anymore – Real provides not just a player, but the media portal...**

Take 5 – directly to premier partner content

Content bar – specific, personalized content links

But the action is in GoldPass – our user is hooked.

David Caulton

Why do you care? This is realplayer, the center of the Real client strategy

1. Note that the user wanted to simply watch abcnews.com... they've gotten a media portal.
2. Internet Explorer and msn are less convenient as a media portal
3. Take 5 – premiere partners who pay for this space – gets users to the coolest, richest content (and advertising)
4. Content bar – customized on install... the content the user wants, right at their fingertips
5. Goldpass – the center of Real's "net" strategy....

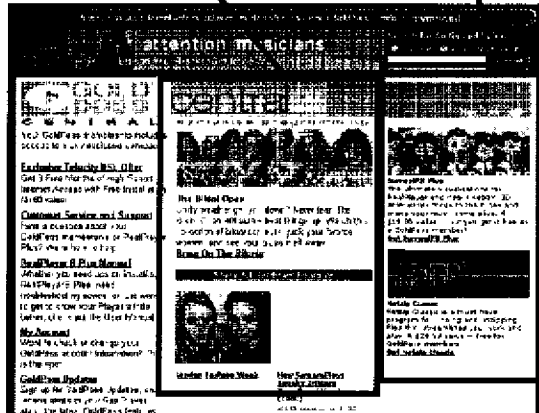

## Demo – Focus on Goldpass

### What is goldpass?

- ▶ GoldPass converts \$29 software purchase into \$120/yr GoldPass subscribers.
- ▶ Planning on getting top 1% (1.55million) users hooked in for this
- ▶ This is also a trojan horse for adware, especially RealDownload
- ▶ But...right now it's very expensive, and without great benefit

Subscription content  
– leading with adult  
PG-13 or R content

Subscription-  
based Plus  
Pack – new free  
software every  
month

David Caulton

Why do you care? Goldpass is the central Real subscription service.

1. Converts \$30 users into \$120/yr subscribers
2. Plan to get 1.55 million subscribers
3. You get cool exclusive (adult and lowbrow) content
4. You also get "free" software – some useful, some adware.
5. Now introducing other draws – sweepstakes.

This demo will show first a Goldpass video featuring bikinis, and then a user downloading a free game.

Demo - Grabbing the media ecommerce experience with Bluematter

**bluematter**  
premium digital music

- ▶ **Intertrust**
  - ▶ Provides DRM solution (license management, content encryption)
- ▶ **Magex**
  - ▶ Client side wallet, e-commerce clearing house
  - ▶ Founded by National Westminster Bank
- ▶ **RealNetworks**
  - ▶ RealJukebox for content playback, playlist management, interface for cover art and lyrics
- ▶ **Universal Music Group**
  - ▶ Content provider and financial backer

David Caulton

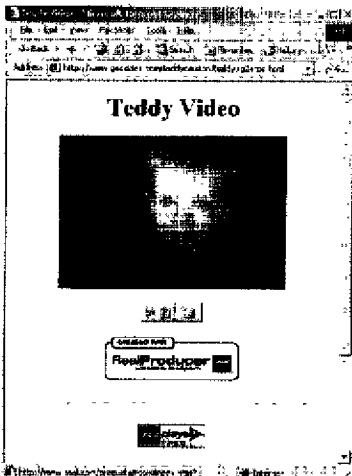

Why do you care

## Bluematter Discussion

- ▶ **Easy, consistent purchase UI**
- ▶ **Secure downloads**
- ▶ **Single wallet, very simple to use and recharge**
  
- ▶ **Weaknesses – not fully baked**
  - ▶ *One format only*
  - ▶ *Showstopper bug - Can't move/backup licenses*
  - ▶ *RealJukebox only*
  - ▶ *Very limited content selection*

Demo - Making internet media easy on **YAHOO!GeoCities**

**Wins for Hosting service:**  
Eats bandwidth, space...drives upgrades to premium, cool feature

**Wins for Real**  
Viral Marketing - All my relatives now have RealPlayer installed and the link is to Real Entertainment Center  
Platform adoption

*Weaknesses – not very powerful (but do users care?), sloppy execution*

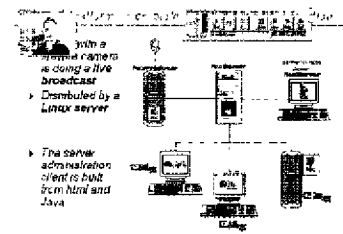

Strategic Review: RealPlayer      - David Caulton, Confidential - Internal Use Only 107

David Caulton

Why do you care? This cool product makes it easy to get video up onto your hosting service and web server.

1. Great for geocities, drives users up to premium subscription
2. Great for Real – gets more players out there, gets more real files on the web
3. Revenue for Real

## RealPresenter Plus demo - enabling content for business

Recording a presentation... easily creates and serves very rich SMIL content that you need RPlayer to view

Viewing it, live or on demand, p2p from client machine (with lots of RN ads)

-Deeper into the infrastructure of corps – moves ppt files onto their platform one way.

-Drives Player downloads.

-Developed for free by Intel Labs

Cons: Somewhat cranky to install – dependent on lousy capture devices Also, the P2P model is scary to enterprise

Strategic Review - RealPresenter

David Caulton

## Demo Summary Slide

- ▶ We've seen how users start out wanting Real content
- ▶ ... but get sucked into more software and services  
Also how once you have RealPlayer, Real is the media portal - you don't need IE or MSN to get to media so Real gets the advertising and subscription revenue
- ▶ We've also seen how real is monetizing windows, creating an "adware" Windows and internet user experience - nowhere in windows is more than a click away from RealNetworks portals, placements, advertising and services
- ▶ With Realpresenter and Yahoo, Real is enabling end-user intranet and internet media creation. in RN platform
- ▶ While these first three points strengthen the virtuous cycle so Real dominates both player reach and format, we've seen how they're working to make sure nobody needs windows for any part of their media world

RealPresenter Plus  
YAHOO! GeoCities
