Subject: Burstware v2.5 for Linux

Tracy,

The upgraded version of Burstware for Linux is available for download from
our FTP server. You can obtain the latest version (2.5) as well as the new
bridge code that was released a few months ago from this server as well. The
v2.5 for Linux now supports the latest version of Redhat and Java. No file
size limits will hamper users.

Here is the download information.

ftp.burst.com

login as "burstware@burst.com"

pass word is "burstisbest"

Regards,

Eric Walters
