

NEW DATABASE DIRECTIONS FAXLINE

Customers with questions about Borland's database product direction

can fax their questions to 415/989-5422 and they will receive a personal reply from Borland. The BORLAND DATABASE DIRECTIONS FAXLINE will remain in service for as long as requests for information continue to come in. (To provide every interested party with the best possible service, Borland requests that questions be limited to one question per

fax inquiry.)

The BORLAND DATABASE DIRECTIONS FAXLINE becomes operational on July 24, the day of its customer event.

This fax line concept is COOL! We should have one for Windows. We could advertise it with "Ask BillG a question ..." etc. I wonder what the operational side of running this line would entail, and if customers would come away satisfied. I do think this is an ultra-cool idea though.

My name is Clifford Low and I will be Managing the Self Thru Database.
Please let me know if there is any questions or concerns with the data.

June Sell Thru data is now available on server. You can load it
by copying down the files from this server:

\\USMARKET\MRMA MUKAMUKS
\\FRONTEND subdirectory

**** Quick Analysis ****

MS 5062424
CONFIDENTIAL

- 1) June Sell Thru units for DOS 5 Upgrades total 439,108

the new std font dialog does distinguish tt fonts. yet chrisp has refused to incorporate into winword2. must not be that important. or was he depending on caps to distinguish?

I visited with Momenta Corp yesterday, a startup that is working on a notebook pen based computer. They had asked to talk to us about support for mobile computing in our OSs/NOSSs. They thought it lacking.
