I have already done a draft of the wrap-up slides. I would like you to look these over. I will have neffb forward you a set. You can still make any changes you wish.

I agree we should do the OS/2 demo. I also think Steveb's talk is the place d to do it.

Can you please forward a copy of the warp-up slides to Brad for his review. I think these slides are done and won't need much in the way of changes, but it's important to get Brad a copy for review.

Thanks,
Cam

Subject: Demo OS/2 "bad app" at 3.1 PDC
Cc: billmi bradsi ericfo jonl steveb
Date: Sun Jul 28 17:36:05 1991

Brad has suggested (and I wholeheartedly agree) that we should work a demo of the OS/2 "bad app" during Steve's talk at the PDC. We may want to add a little time to his talk. It's important to go over the OS/2 2.0 vs. Windows info and I think Steveb is the guy to do it. i would rather add a few minutes to his talk than add a separate session.

Ericfo can help arrange the demo. You should also bring this up with Steve in case he wants to add a slide or two about this as well.

Thanks,
Cam

Thanks for the concern - I see your designation of duties to be wise, and absolutely the best thing to guarantee success of the project. As you can imagine, we saw alot of great work going on and hoped to see it continue. We'll look forward to working with Eric and Tom, and Compaq will be relieved to know how many top-notch people are helping from our end.
