Demos > Windows Media Audio and Video 8 > Windows Media 8 Audio

Search Windows M

Microsoft® Windows Media™ Audio 8 delivers unmatched audio quality for streaming and download-and-play on PCs and portable devices. The new Windows Media Audio 8 delivers the same quality as MP3 at near one-third the size.

### Contents

#### Demos Home

- Windows Media Player for Windows XP
- Windows Movie Maker for Windows XP
- Windows Media Audio and Video 8

#### Windows Media Audio offers:

- **Near-CD Quality now at 48kbps**
- **CD Quality at 64kbps**
- **Unmatched Fidelity at any Level**
- **Integrated Digital Rights Management**
- **Full Compatibility with Windows Media Player 7, Windows Media Player 6.4, and all consumer electronic devices supporting Windows Media Audio.**

#### Hearing is Believing!

Listen to the audio files below to hear for yourself why Windows Media is the leader in digital music quality.

	Livin' on Borrowed time Travis Tritt	Brandenburg Concerto No. 1 J.S. Bach	In The Dark Marc Nelson	Tonight Marc Nelson
Original WAV Uncompressed				
Windows Media 8 Near-CD Quality 48kbps				
Windows Media 8 CD Quality 64 kbps				
Real Audio 8 44 kbps				
Real Audio 8 64 kbps				

#### For the true Audiophile:

Windows Media Audio 8 encoding captures more of the original WAV audio file than MP3 or Real Audio 8. We have created an audio demonstration so you can hear and compare what gets left behind when encoding with MP3, Real Audio, or Windows Media 8.

Download the **Windows Media Download package** to hear the difference for yourself.
