Doug,

I would like your input before I respond to this. Let's find some time by Tuesday. Thanks.
Richard

Subject: conference call

Dear richard

i tried to talk to you after the conference call-the purpose of same was in my view to restore the credibility of management with the board after the last board meeting and to establish a clear line of communication with management.

i think that this did not happen and that many of the events that have taken place are extremely worrying for the company-the fact that we were told that part of the reason that we did not close the round was that doug was away is inexcusable.

there seems to be a major change of direction in the company ie towards a liason with the big telco,s-may be its the right thing but is it putting all arte eggs in the one baskets

the problems that have arisen recently are too numerous to be a coincidence

failure of financing

problems with product

movement of tom koshy to uk

kyle

marketing manager

ed davies

lack of sales

u2 debacle

confusion at top

your bonus discussions

doug investment

property fiasco

canadian sale or lack of

e offering

and many more

despite the abc coup i think mgmt have lost credibility and we need to have our house in order before the next board meeting

don,t get me wrong richard you know that i am your greatest supporter but i am worried about all the above and i know that my thoughts are shared by other board members-in view of our long relationship i will always be 100% with you

perhaps we can talk about same
