

Anybody want to meet on Saturday, March 14?
If not, the next available meeting time would
be Thur 3/19 or Fri 3/20 (could they meet without
you since you're going to be out all of next
week?). Or Sat March 21 might be a possibility.

bill requested that we get together to brainstorm on dos astro. can we
do it one evening
this week (not wednesday)? this week is best as I am out all next
week. thanks.

we need to find a replacement for richta's sbt next monday. rich
would be ideal for the rtm tour. i really want him with me.

here are some people who could cover for rich: russw, jonl, pattys. others?

i'd love for patty to give it esp as she is the former canadian gm.

DR-DOS came to IBM and requested Windows Sources to investigate the
problems with DR-DOS and develop a Windows Clone. Apparently, IBM
refused to give them sources but is letting them work in Boca with the
Windows sources.

Of course this is information I received while discussing the other stupid
things IBM (Tommy Steele, Lee Reiswig, and others) are doing
to screw MS with my previous manager at IBM. Barbara Hauger (formerly,
Barbara Miller, DOS and Windows Planning Manager). She left the
programming center in Feb.

While I can not confirm this information, I can tell you Barbara is
a great fan of MS and wishes circumstance would have let her make
the move I did. She wouldn't make this up. If anything she plays
these things down so I don't get so pissed.

Do not under estimate the extent these guys will go to screw us.
